CRIME AND JUSTICE IN NEW YORK STATE

1979 Annual Report

This is the fifth annual report of crime in New York State prepared pursuant to the responsibility assigned to the Division of Criminal Justice Services (DCJS) by Chapter 654 of the laws of 1974. In addition to reflecting the data reported by the police of New York State through the Uniform Crime Reporting program, the report also provides a broad overview of the roles played by the entire criminal justice community in responding to the problem of crime in this state.

The support and cooperation of over 600 police agencies, sheriff's offices and specialized police agencies participating in the Uniform Crime Reporting program has proved invaluable in assisting DCJS in carrying out its responsibilities.

Because of the nationwide concern over the continually increasing severity of the Arson problem in this country, the Congress of the United States enacted legislation mandating the collection of data concerning the offense of Arson in the national Uniform Crime Reporting program. New York State as a participant in the national program initiated the collection of this specialized data in April, 1979. This report contains the first of an annual series of Arson Incident Analysis reports.

The Felony Processing System has provided data concerning indictments, dispositions and sentences. That data is reported to DCJS by the district attorneys of this state to whom we express our appreciation for their cooperation and assistance.

To provide a more comprehensive view of the criminal justice process, data from the courts, probation, corrections and parole agencies has been added to the report. We are indebted to the State Administrator of the Courts, the Commissioner of the New York State Department of Corrections, the Director of Probation and the Chairman of the Board of Parole for their contributions. In this report for the first time we have included data graciously provided by the Crime Victims Compensation Board to provide a better understanding of the problems confronting victims of crime in New York State.

We trust that the data contained in this report will prove useful to the criminal justice administrator, to the executive and legislative branches of government, to researchers, planners and the general public. We are confident that the contributions and counsel of those who have participated in the preparation of this report will continue to assist us in providing the people of New York State with a better insight into the problem of crime in New York State.

Frank J. Rogers
Commissioner

FOREWORD

In 1979 the crime index in New York State reversed the declining trend of the previous two years. The Part I offenses reported in the New York State Uniform Crime Reporting program showed a 6.5 percent increase over 1978.

However, while the volume of crime reported by the police is a very significant factor in assessing the effectiveness of the criminal justice community in combating the problems of crime, it represents only one facet of the complete process. This report attempts to present data reflecting activity in all the major components of criminal justice. While the criminal justice information system which existed through 1979 did not permit the complete tracking of all cases through the entire process, we have been able through the Felony Processing System to track cases from indictment through sentencing. We are hopeful that the redesigned criminal history information system will permit the tracking of cases from arrest through the appeal process to provide an even more comprehensive assessment of the criminal justice system.

In the continuing fight against crime, several positive indicators are reflected in this report. The number of arrests increased, particularly arrests for violent offenses. Special sentences for recidivists, aimed at the habitual criminal, also increased. Defendants sentenced for a second felony conviction receive mandatory prison sentences of extended length. Juvenile offenders who commit violent acts are now held responsible and subject to more severe penalties.

The conflict between society and crime is a dynamic struggle which requires the concern and support of all people. In producing this report, our intention is to focus attention on the extent of crime in New York State and the response to it by the criminal justice community.

INTRODUCTION

The New York State Division of Criminal Justice Services was assigned the responsibility for the collection of data concerning crimes and arrests in New York State, effective January 1, 1975, pursuant to Chapter 654 of the laws of 1974. In assuming that responsibility, the Division also was committed to providing relevant data to the National Uniform Crime Reporting program administered by the Federal Bureau of Investigation. This document is the fifth annual report produced in the discharge of that responsibility.

The bulk of the data contained in this report was obtained from the reports contributed by police agencies participating in the New York State Uniform Crime Reporting (UCR) program. In 1979, 617 police agencies representing 100.0 percent of the police agencies in New York State contributed monthly data to the UCR program. Each agency which has multi-county jurisdiction submits reports for each county in which it has enforcement responsibility. The cooperation and assistance of law enforcement continues to be of exceptionally high quality.

In addition to UCR data, this document also contains aggregate data from a number of other sources; the Summary Criminal History (SCH) System, Felony Processing System and Statistical Analysis Center -- all part of the Division of Criminal Justice Services. The SCH system provides data concerning felony arrests reported to DCJS on arrest fingerprint cards in compliance with Section 160.20 of the Criminal Procedure Law. The Felony Processing System provides data concerning felony indictments, dispositions and sentences as submitted by the district attorney in each county in accordance with Section 837-a of the Executive Law. The indictment data included in this document complements the quarterly felony processing reports provided the Governor and leaders of the legislature as required by law. The Statistical Analysis Center (SAC), which was established in 1976, provides the New York State criminal justice system with the capability for conducting the in-depth studies necessary to examine the manner in which the system is operating.

In 1978, the Congress of the United States enacted legislation mandating the Uniform Crime Reporting program of the Federal Bureau of Investigation to collect Arson offense data as part of its program, effective January 1, 1979. Although New York State has collected Arson data since 1975 as part of the New York State Uniform Crime Reporting program, the data requested by the national program is different in a number of aspects both in definition and in data content. Accordingly, beginning with April, 1979, data has been collected both in the New York State and FBI formats. The results of the FBI format collection are reflected in the Arson Incidence Analysis Report, the first of a series of such reports.

We have also incorporated excerpts of reports prepared by the Office of Court Administration, the New York State Division of Probation, the New York State Department of Correctional Services, and the New York State Division of Parole. This year for the first time we have included data provided by the Crime Victims Compensation Board.

We are hopeful that the data contained in these special segments will help to round out the data available from DCJS files and provide the reader and the practitioner with a more comprehensive and therefore more meaningful perspective of the criminal justice process in New York State.

Victimization studies commissioned by the Law Enforcement Assistance Administration of the United States Department of Justice indicate that crimes actually committed significantly outnumber the amount of crime reported in the Uniform Crime Reporting program. It should be recognized that UCR reflects the crimes which are reported to or otherwise become known to the police. For a variety of reasons, many citizens do not bring to the attention of the police the fact that they have been victimized by crime. Until such time as all citizens recognize the importance of reporting the incidence of all crimes to the police, UCR statistics will continue to reflect less than the total crime problem confronting American society.

The problem of crime is multi-faceted. The factors causing crime are many and varied. Few of the factors are directly controllable by the police, who are only one segment of the criminal justice community and a very small part of society as a whole. While the criminal justice agencies are statutorily responsible for the enforcement and prosecution of our criminal laws, no segment of society can escape some degree of responsibility for the incidence of crime.

A factor seldom considered is that many of the crimes committed are of such a nature that the police are virtually powerless to prevent them. Offenses which occur inside buildings and spontaneous crimes which involve persons of the same family or individuals with a previous relationship are almost impossible for the police to prevent or deter. The attention of law enforcement agencies should, therefore, be focused primarily on those crimes on which they can realistically be expected to have an impact. To provide some guidance in this regard, the 1979 report has attempted, in an admittedly limited manner, to categorize crime by type of location of occurrence.

The UCR data included in this report are divided into five main segments:

A. Reports of Part I offenses comprising the following seven crime classifications:

1. Criminal Homicide
    - a. Murder and Non-Negligent Manslaughter
    - *b. Negligent Manslaughter
2. Forcible Rape
3. Robbery
4. Aggravated Assault
5. Burglary
6. Larceny
7. Motor Vehicle Thefts

*All of the above, with the exception of 1(b) Negligent Manslaughter, comprise the Crime Index, which is used to measure the relative extent of crime nationwide and to show trends in crime.

We have also attempted to provide greater dêtail about reported index crime including:

- a. Type of weapon/force used
- b. Type of location in which the crime was committed
- c. Number of offenses cleared
- d. Type and amount of property stolen and recovered

B. Part II Offenses

8. Arson
    commercial or residential
9. Kidnapping
10. Controlled Substances
    Sale/Manufacture - Opium, Cocaine, Derivatives, Marijuana, Synthetic Narcotics, Other Dangerous Drugs

    Use/Possession - Opium, Cocaine, Derivatives, Marijuana, Synthetic Narcotics, Other Dangerous Drugs
11. Dangerous Weapons
    Handguns, Other Firearms, Explosives, Other Weapons
12. Bribery
13. Sex Offenses
14. Extortion
15. Forgery & Counterfeiting
16. Prostitution & Vice
    Promoting Prostitution, Prostitution
17. Stolen Property
18. Coercion
19. Criminal Mischief
20. Fraud
21. Gambling
    Bookmaking, Numbers & Lottery, All Other Gambling

22. Offenses Against Public Order

23. Embezzlement

24. Simple Assault

25. Offenses Against Family

26. Driving Under Influence Alcohol, Drugs

27. Unauthorized Use of Vehicle

28. Possession of Burglar Tools

29. Liquor Law Violations

30. Disorderly Conduct

31. Public Drug Intoxication

32. Loitering

33. All Other Offenses

C. Age, Sex and Race of Persons Arrested

1. Persons Under 16 Years of Age (Juvenile)

2. Persons 16 Years of Age and Over (Adults)

The arrest reports reflect the number of persons arrested for Part I and Part II offenses, as described above.

NOTE: The FBI/UCR program treats persons under 18 as juveniles, and requires that they be so reported. This report, however, is compiled in accordance with New York State law which classifies juveniles as those persons under 16 and adults as those 16 and over.

D. Law Enforcement Officers Killed or Assaulted

Statistics are provided on the number of New York State law enforcement officers killed or assaulted and description in some detail of the conditions under which the officers were assaulted.

E. Homicide Analysis

This portion of the report provides details on homicides committed in New York State, describing the victims and circumstances under which such homicides occur.

In order to combat crime effectively, it must be known when and where crime is occurring. The county, as a crime location index, is not sufficiently definitive. Therefore, we have instituted direct reporting to the state program from every police chief and sheriff in New York State in accordance with state law.

Population Data Sources

Actual counts of the population are only made in the decennial census. Because significant changes in population can occur in the ten-year period between these census enumerations, population estimates are often made for these intervening years. These estimates are made by various state and federal agencies using such information as birth and death rates, tax filings, school enrollments, and so forth. Often they are several years in preparation as data are collected on which to base the estimate. Because they are estimates, these figures may vary from the actual population, and, until they can be verified by an actual census count, there is no way of knowing how accurate a given estimate is.

The method of obtaining population data used for calculating crime rates for the '79 Annual follows the same criteria established in the '78 Annual.

They are as follows:

1. Currency - The estimate must be for the most recent year possible.

2. Authority - The estimate must be made by an agency or organization using appropriate and accepted techniques.

3. Coverage - Estimates must be available for the jurisdictions of interest to DCJS in calculating crime rates.

Not all authoritative sources are current and not all cover the appropriate jurisdictions. To get the "best" population data, therefore, a "mix" of sources was utilized. These same basic sources will be used (appropriately updated) for subsequent Annuals until; a) results of the 1980 census are published; or, b) better sources become available.

Population estimates used in the Annual are derived from the following sources:

- County Totals (Including New York City Counties); places of 10,000 or more population: NYS Department of Health/Office of Biostatistics provisional estimates for July 1, 1979 (non-institutional populations).

- Municipalities of less than 10,000 population: Estimates by the Federal Bureau of Investigation as of January 1979. (Some municipalities of over 10,000 population not listed by the Department of Health are estimated from this source.)

- Jurisdictions under 10,000 population not reporting in 1978 but added in 1979 (i.e. not available from the FBI): United States Bureau of the Census provisional estimates for July 1, 1977.

- The state total is derived by summing the county totals from the Department of Health.

While the Health Department does not issue the "official" state population statistics, it provides much of the data used to make these official estimates and is the most current source available. Official local population estimates are issued by the State Economic Development Board in cooperation with the Census Bureau, but these are less current than other sources. In general, Census Bureau data are not issued for at least two years after the estimated year.

STATUTORY AUTHORITY

The collection, analysis and dissemination of criminal justice data in New York State is authorized by Sections 837, 837-a and 837-b of the Executive Law, to wit:

"§ 837. Functions, powers and duties of division

The division shall have the following functions, powers and duties:

... 4. In cooperation with the state administrator of the unified court system as well as any other public or private agency,

... (c) collect and analyze statistical and other information and data with respect to the number of crimes reported or known to peace officers, the number of persons arrested for the commission of offense, the offense for which the person was arrested, the county within which the arrest was made and the accusatory instrument filed, the disposition of the accusatory instrument including, but not limited to, as the case may be, dismissal, acquittal, the offense to which the defendant pled guilty, the offense the defendant was convicted of after trial, and the sentence."

"§ 837-a. Additional functions, powers and duties of the division

In addition to the functions, powers and duties otherwise provided by this article, the division shall:

1. Collect and analyze statistical and other information and data with respect to the number of persons charged with the commission of a felony by indictment or the filing of a superior court information, the felony with which the person was charged therein, the county within which the indictment or superior court information was filed, the disposition thereof including, but not limited to, as the case may be, dismissal, acquittal, the offense to which the defendant pleaded guilty, the offense the defendant was convicted of after trial, and the sentence."

"§ 837-b. Duties of courts and peace officers

1. It is hereby made the duty of the state administrator of the unified court system; and of every sheriff, county or city commissioner of correction and head of every police department, state, county or local, and also railroad, steamship, park, aqueduct and tunnel police and town constables, of every district attorney, of every probation agency; and of head of every institution or department, state, county, and local, dealing with criminals and of every other officer,person or agency, dealing with crimes or criminals or with delinquency or delinquents, to transmit to the commissioner not later than the fifteenth day of each calendar month, or at such times as provided in the rules and regulations adopted by the commissioner, such information as may be necessary to enable him to comply with subdivision four of section eight hundred thirty-seven. Such reports shall be made upon forms which shall be supplied by the commissioner.

2. Such officers and agencies shall install and maintain records needed for reporting data required by the commissioner and shall give him or his accredited agents access to records for the purpose of inspection.

3. For every neglect to comply with the requirements of this section, the commissioner may apply to the supreme court for an order directed to such person responsible requiring compliance. Upon such application the court may issue such order as may be just, and a failure to comply with the order of the court shall be a contempt of court and punishable as such."

THE

PROBLEM

THE PROBLEM

After two successive years of decline, Index Offenses registered a 6.5% increase from 1978 to 1979. New York State police agencies reported 1,090,397 Index Offenses in 1979 compared to 1,024,047 in 1978.

Each Index Offense - Murder, Rape, Robbery, Aggravated Assault, Burglary, Larceny and Motor Vehicle Theft - showed offenses above the levels reported in 1978.

The Division of Criminal Justice Services began collecting Uniform Crime Reports in 1975 and this edition of Crime and Justice presents material on Index Offenses for the five year period 1975-1979.

Although Index Offenses are the national standard and were selected because of their seriousness or volume, they do not give a comprehensive picture of criminal offenses. For this reason, the Division collects and publishes data on Part II Offenses which include Kidnapping, Drug Offenses, Sex Offenses, Dangerous Weapons as well as less serious offenses.

Comparisons between counties or individual police agencies should be made cautiously, since these data reflect only offenses and population but do not consider seasonal and transient population, socio-economic conditions, density of population, number of police officers, community attitudes, geographic location, or urban vs. rural characteristics.

As in previous years, the map depicting the rate of Victim Confrontation Crimes shows only the New York City counties with a rate above 6 per 1,000. In 1979, Monroe and Erie counties were the only two counties whose rates were in the 4.5+ to 6.0 per 1,000 range. Monroe County was an addition to this group in 1979, replacing Sullivan County which dropped into the +3.0 to 4.5 category.

Violent Offenses

'Violent' offenses include Murder, Non-Negligent Manslaughter, Rape, Robbery and Aggravated Assault; crimes that involve victim-offender confrontation and frequently injury to the victim. These 'Violent' offenses make up 14.8% of the Index total.

In New York State, 'Violent' offenses rose from 149,213 in 1978 to 161,615 in 1979, an increase of 8.3%. New York City showed a 7.9% rise in 'Violent' offenses and Upstate reported an increase of 10.2%. Over 80% of the 'Violent' offenses occurred in New York City.

Non-Violent Offenses

The 'Non-Violent' offenses included in the Index total are Burglary, Larceny and Motor Vehicle Theft. These offenses make up 85.2% of the Index total and showed a 6.2% rise from 1978 to 1979.

Geographically, 'Non-Violent' offenses are more evenly divided than 'Violent' offenses, with the New York City share at 52.6% and Upstate at 47.4%. From 1978 to 1979 New York City registered a 9.2% increase in 'Non-Violent' offenses compared to 3.0% Upstate.

Rape

Statewide, 5,381 forcible rapes and attempted forcible rapes were reported, an increase of 4.3% over 1978. Included in the total are 4,374 actual rape offenses and 1,007 attempts. The completed offenses show a 7.7% increase and the attempts a 8.0% decrease from 1978. The clearance rate for all rape offenses was 40.9%.

More than half of the rape offenses involved the use of weapons and in 8.6% of the offenses, a handgun was used.

Rape offenses made up 3.3% of the 'Violent' offenses total.

Robbery

Statewide, robbery offenses increased 11.5% from 1978 to 1979 while robberies involving handguns rose 16.7% during the same time period. In New York City, where 88.5% of the robberies occurred, 29.9% involved handguns compared to 22.5% Upstate.

Robbery is primarily a street crime with nearly 60% of all robberies committed on streets and highways, where strong arm tactics are generally used. Robberies of banks, commercial buildings, convenient stores and gas stations most frequently involve the use of handguns. Although bank robberies increased by 27.3%, they continued to make up only 1.0% of the total robberies.

The clearance rate for all robberies was 15.7% in 1979.

Aggravated Assault

The 3.9% increase in aggravated assaults from 1978 to 1979 is the smallest increase among Index Offenses but the 60,802 offenses reflect a steady rise each year since 1976. The street was the scene of 44.4% of the aggravated assaults, with residences the location in 29.2%. Knives and other weapons were used in 60.0% of the aggravated assaults statewide, with handguns responsible for another 14.8%. New York City data showed handguns used in 19.0% of the aggravated assaults compared to 3.4% Upstate. Aggravated assaults were cleared at a rate of 47.9% statewide.

Burglary

Statewide, burglary of residences accounted for 65.5% of the 307,095 offenses committed in 1979. No force was necessary for intruders to gain access in one out of six residential burglaries. In New York City, when the time of the offense could be determined, 70.7% of the residential burglaries took place during the day and 75.2% of the non-residential burglaries at night. Upstate showed the time of residential burglaries evenly divided between night and day with burglaries of non-residences occurring at night in 84.4% of the offenses. The clearance rate for burglaries was 13.3% statewide.

Larceny

Larceny is the only Index Offense which occurs more frequently Upstate than in New York City. In both areas, larceny offenses increased from 1978 to 1979, up 10.3% in New York City and 5.1% Upstate. Thefts from motor vehicles and of motor vehicle parts predominate in both areas. The bulk of pocketpicking and purse snatch offenses occurred in New York City while Upstate registered more shoplifting and bicycle theft offenses. Although the larceny category includes offenses of any amount, nearly 30% were for offenses involving two hundred dollars or more. Larceny offenses were cleared at a rate of 14.5%.

Motor Vehicle Theft

Statewide, 124,057 motor vehicle thefts were reported, a 4.2% increase over 1978. Motor vehicles parked on streets were particularly vulnerable, accounting for three out of four vehicle thefts. Stolen motor vehicles had an average value of $2,945 with automobiles accounting for 91.7% and trucks, buses and other vehicles making up the remaining 8.3%. Motor Vehicle Thefts were cleared at a 7.9% rate.

Part II Offenses

Part II offenses totaled 1,215,863 in 1979 up 2.7% from the 1,184,070 reported in 1978.

Excluding the miscellaneous category "all other offenses", Criminal Mischief offenses accounted for the largest percentage of Part II offenses, 23.6%; followed by Disorderly Conduct, 9.0% and Simple Assault, 6.8%. Serious offenses such as Arson, Kidnapping, Dangerous Weapons, Sex Offenses and Controlled Substance made up 6.5% of the Part II total. The clearance rate for Part II offenses was nearly 60%, perhaps influenced by situations where the offense and clearance occur almost simultaneously; e.g. Use/Possession of Controlled Substances, Dangerous Weapons, Prostitution, Driving While Intoxicated and Loitering.

Dangerous Weapons

Dangerous Weapon offenses increased from 10,374 in 1978 to 11,119 in 1979, a rise of 7.2%. Statewide, 45.6% of the dangerous weapon offenses involved handguns, 60.5% in New York City and 25.6% Upstate.

For New York State, the clearance rate for all dangerous weapons was 80.7%.

Stolen Property

The $890,371,260 in property and currency stolen in the commission of Index Offenses in 1979 represented nearly a 25% increase over 1978. Among the more dramatic increases was the 43% rise in the value of jewelry and precious metals stolen. As in previous years, stolen vehicles at 41% made up the largest share of property stolen and recovered motor vehicles accounted for 77% of the property recovered.

PERCENTAGE OF HANDGUNS INVOLVED IN SPECIFIED OFFENSES
NEW YORK STATE
1979

HOMICIDE 1979

The Offense

The three-year decline in homicides which started in 1976, was reversed in 1979. Homicide offenses increased 15 percent from 1,818 in 1978 to 2,098 in 1979. Rates of increase in the three principal areas: New York City, Metropolitan Planning Areas outside New York City and Rest of the State, were similar at 15%, 14% and 15%, respectively. The 1979 level of homicides is the highest ever while that of the previous year is the lowest in seven years. (Table 1.) In 1978, the most recent year comparative data are available, New York State's homicide rate of 10.3 per 100,000 inhabitants was the fourteenth highest in the nation. (FBI: Uniform Crime Reports for the U.S. 1978.)

For the first time in seven years, the peak month of homicides shifted from December to October. Homicides were lowest in the first quarter and consistently rose in subsequent quarters. This quarterly trend has held in each year since 1976 (Table 1.)

New York City accounted for the bulk (83%) of homicides. The remaining 17 percent occurred in the Metropolitan Planning Areas outside New York City (11%) and the rest of the State (6%). These proportions have remained unchanged in the last five years. (Table 1 and Figure 1.)

In almost two-thirds (64%) of the homicides, in which the relationship is known, the victim and the offender knew each other. More than half occurred in connection with an altercation and a similar proportion occurred indoors. Close to one out of every four homicides (23%) was a group crime involving multiple offenders. The weapons most frequently used were firearms (55%) consisting mainly of handguns, followed by cutting or stabbing instruments (25%). (Table 2 and Figure 2.)

As in the previous year, New York City homicides tend to be more violent than those in the rest of the State: they are more likely to be perpetrated as a group crime, with the use of a handgun, and in conjunction with a robbery. Also, they are more likely to occur outdoors. New York City homicides are less likely than homicides occurring elsewhere in the State to involve victims who are white, female and physically vulnerable (the very young and the elderly). The majority of known offenders is black in New York City homicides and white in the rest of the State. Homicide offenders tend to be younger in New York City than in the rest of the State. No Hispanic victims or offenders were reported in homicides outside New York City. (Table 3.)

Firearms are the most frequently used weapon in homicides involving multiple offenders, those in which the victim and offender are strangers, those not connected with altercations, and those occurring outdoors. Homcides in which a stabbing or blunt instrument was used are most likely to be connected with an altercation and be committed indoors by a single offender against a nonstranger. (Table 4.)

The Victims

The 2,098 homicide victims are predominantly male (80%). More than half (54%) are 20-39 years old. Blacks constitute the largest victim group (45%) followed by whites (30%) and Hispanics (23%). This pattern of victim characteristics has not changed in the past five years. (Table 5 and Figure 3.) While the overall percentage of female victims is 20 percent, that percentage is high in the extreme age groups: 42 percent among the very young (under 10) and 46 percent among the elderly (60 and over). Elderly victims are more likely than younger victims to be white. The proportion of non-white victims falls sharply among victims aged 40 and over. In each of the age groups under 60, the proportion of victims who are black is stable compared to that of whites or Hispanics. (Table 6, 7.)

As expected, the killing of the very young victims suggests situations indicative of family abuse, while the killing of the elderly is indicative of more "predatory" offender behavior. The very young are more frequently (than older victims) killed by a single offender, who is a nonstranger, with the use of "personal" weapons (i.e., hands, fists, etc.), indoors and under circumstances not related to altercation or the commission of another felony. The elderly are more likely than younger age groups to be murdered by a stranger, and in connection with the commission of another felony. The likelihood of being killed in a multiple offender situation or by a stranger, tends to increase with victim age. (Table 8.)

Male victims are more likely than female victims to be killed by a group of offenders, with the use of a firearm, outdoors and by strangers. On the other hand, female victims are more likely to be killed by a single offender, indoors, by a member of the family using weapons other than firearms such as stabbing or blunt instruments or strongarm methods. (Table 9.)

Hispanic victims have the highest likelihood of being killed by a handgun (56%) followed by blacks, "other" and whites. White victims are more likely than nonwhite victims to be killed by a stranger in connection with the commission of a felony. On the other hand, nonwhites, especially blacks, are more likely than whites to be killed during an altercation. (Table 10.)

The Offenders

As with victims, homicide offenders are predominantly male (91%) and blacks are the largest offender group (51%). Offenders tend to be younger than victims. This pattern of offender characteristics was also true in 1978. The mean age of offenders and victims is 27.4 and 34.3 years, respectively, and the median age is 24.4 and 30.2 years, respectively. (Table 11, 12.)

The percentage of offenders in each of the two age groups covering ages 30 to 59 is higher among female offenders than among male offenders. (Table 13.)

The propensity to commit group crime is strongest among offenders in their late teens (57%) and tends to weaken with offender age. To a lesser degree but indicating the same relationship, the use of a handgun, the occurrence of criminal motivation (i.e., felony connected homicides), and the victimization of a stranger tend to decline with offender age. On the other hand, the occurrence of noncriminal motivation (altercation), the victimization of persons known to the offender, the use of personal weapons (hands, fists, etc.) or stabbing/blunt instruments in an indoor setting are characteristics that appear associated with older offenders. (Table 14.)

The race distribution of male offenders is similar to that of female offenders. (Table 15.)

Female offenders tend to be less violent than male offenders. They are less likely to engage in group crime, use handguns, or be criminally motivated. They are more likely to commit homicide indoors, involving a family victim during an altercation or romantic dispute. (Table 16.)

Black and Hispanic offenders are more likely than other offender race groups to commit homicide as a group crime, with the use of a handgun and in conjunction with a robbery. (Table 17.)

Homicide offenders clearly tend to victimize members of their own race. The percentage of persons who killed persons of the same race is highest among white offenders (77%). It is 75%, 67% and 68% among black, Hispanic and other races, respectively. (Table 18.) The data do not indicate that homicide offenders tend to victimize persons of their own sex or of the same age group. However, teenage and juvenile offenders more frequently victimize the elderly than any offender age group under 60. (Table 19.)

**This category includes offenders who had multiple victims that belonged to different race categories. Where the multiple victims of an offender all belonged to the same race category, the offender was counted in that race category.

***This category includes offenders who had multiple victims that belonged to different age groups. Where the multiple victims of an offender all belonged to the same age group, the offender was counted in that age group.

Notes

THE

RESPONSE

ARRESTS

The 898,136 arrests reported in New York State in 1979 were in response to 2,306,289 offenses reported in 1979 and may also include some offenses committed in prior years. This establishes an arrest-offense ratio of 38.9% in 1979. In 1978, the 891,724 arrests versus 2,208,198 offenses showed a ratio of 40.4%. During this period total arrests increased 0.7% while total offenses showed a rise of 4.4%.

Juxtaposing Part I arrests and Part I offenses shows arrests increasing 1.5% from 1978 to 1979 while offenses rose 6.5%. Among the 185,760 Part I arrests, only those for Rape, with an 8.7% increase, exceeded the rate of increase for offenses, 4.3%. Arrests for Aggravated Assault declined 2.3% while offenses were up 3.9% and Burglary arrests rose 0.4% at the same time that offenses rose 5.1%.

Part II arrests which numbered 712,376 in 1979 were up slightly from the 708,637 arrests reported in 1978. Included among Part II crimes are serious offenses such as Kidnapping, Sex Offenses, Arson, Controlled Substances and Dangerous Weapons offenses. Also included are the less serious offenses of Disorderly Conduct, Loitering, Unauthorized Use of a Vehicle and All Other Offenses.

Arrests for the 'Violent' offenses of Murder, Non-Negligent Manslaughter, Forcible Rape, Robbery and Aggravated Assault totaled 52,741 in 1979 a rise of 1.5% from 1978. They accounted for 28.4% of the Part I arrests and 5.9% of the total arrests.

The arrest-offense ratio among 'Violent' crimes was highest for Murder, 67.8% followed by Forcible Rape, 48.8% Aggravated Assault, 42.0% and Robbery, 24.8%.

Arrests for 'Non-Violent' Part I offenses showed an increase of 1.5% from 1978 to 1979. Each of the categories, Burglary, Larceny and Motor Vehicle Theft reflected small increases during this period. In contrast to 'Violent' offenses, these crimes generally have no confrontation between victim and offender, which provides the police with descriptions of the offenders. As a result, the arrest/offense ratio of these crimes is well below that for 'Violent' offenses with Burglary at 14.5%, Larceny 15.3% and Motor Vehicle Theft 10.1%.

Although the Division of Criminal Justice Services collects data on runaways in cooperation with the National Uniform Crime Reporting program, it has not been included in New York State totals since it is not a crime in this state.

Adult Arrests

The 809,778 arrests for persons sixteen years of age and over accounted for 90.2% of all New York State arrests in 1979 and reflected a 1.4% rise over 1978. Part I arrests totaled 147,370, 18.2% of the adult total and arrests for Violent offenses at 45,163 made up 5.6% of the total.

Excluding the aggregate category "All Other Offenses", males were most frequently arrested for Driving While Intoxicated-alcohol, Larceny, Disorderly Conduct and Drug offenses. Females were most often arrested for Larceny, Prostitution, Disorderly Conduct and Fraud.

Males accounted for 87.2% of all arrests and females 12.8%. For Part I offenses males accounted for 83.4%, females 16.6% and in the 'Violent' category male arrests made up 90.5%, females 9.5%. This arrest breakdown by sex does not differ significantly from the previous year.

Youthful Offender adjudication is generally available for adults sixteen through eighteen and this age group accounts for 19.5% of the adult arrests. Of the 157,966 arrests made for persons sixteen through eighteen, 19.1% were for Robbery, Burglary and Drug Offenses. This age group accounted for 38.1% of the Robbery arrests, 41.4% of the Burglary arrests and 25.1% of the Drug arrests.

Felony Arrests

Statewide felony arrests totaled 137,758 in 1979, an increase of 6.0% from the 129,931 reported in 1978. Arrests for felony drug offenses were up 9.7% and non-drug arrests 5.7%. Drug arrests were responsible for 8.2% of the felony arrests total in 1979, only a slight increase from the 7.9% they represented in 1978.

New York City showed all felony arrests increasing 3.6%, with felony drug arrests up 10.2% and non-drug arrests up 3.0%. Felony drug arrests accounted for 9.2% of the felony arrest total in New York City. The New York City portion of the state total for felony arrests was 68.2%, 76.3% of the felony drug total and 67.5% of the non-drug total.

Both the Suburban Area of New York City and Upstate contributed to the statewide increase in felony arrests. The Suburban Area showed felony arrests up 11.1% while Upstate reflected an 11.8% increase. Felony drug arrests rose 6.2% in the Suburban Area and 9.7% Upstate. Non-drug arrests increased 11.5% in the Suburban Area and 12.0% Upstate.

In considering these increases in felony arrests, it should be noted that felony arrests reported in 1978 were well below the levels reported in the two prior years.

The Suburban Area of New York City made up 11.0% of the non-drug total for the state and 9.3% of the felony drug arrest total. Upstate accounted for 21.5% of the non-drug total and 14.4% of the drug total.

Juvenile Arrests

Juvenile arrests totaled 88,358 in 1979, 5.2% below the 93,184 reported in 1978. They represented 9.8% of the total arrests in 1979, slightly below the 10.4% they accounted for in 1978. Arrests for Larceny made up 18.4% of the juvenile total, with Burglary contributing another 14.1%. Males accounted for 84.6% and females 15.4% of the juvenile arrests. Female arrests were disproportionately high in the Larceny and Fraud categories. Juveniles 15 years of age accounted for 37.8% of the juvenile arrest total, 41.9% of the arrests in the 'Violent' category and 73.2% of the homicide arrests.

New York City

New York City arrests accounted for 63.2% of the state total in 1979 down from the 65.8% share that the city represented in 1978. Total arrests dropped from 587,164 in 1978 to 567,472 during the same time that arrests increased by 6,412 statewide. It should be noted that New York City's portion of the state offense total was only 53.5%. Robbery offenses, 88.5% of the state total occurring in New York City, rose 11.5% while arrests went up 4.8%.

The large increase in the number of Prostitution arrests in New York City is largely accounted for by a change in reporting procedures. In 1978, arrests for Loitering for Prostitution were included with the Loitering arrests rather than with the Prostitution arrests.

The decrease in arrests for Frauds can be attributed in part to a decrease in the number of arrests for "fare beats" by the Transit Authority Police as the result of a revision in their patrol activities to increase the safety of the traveling public.

Upstate

In 1979, a total of 330,664 arrests were reported in the 57 counties outside New York City, an 8.6% increase from the 304,560 reported in 1978. Arrests for 'Violent' offenses were up 9.3%, Part I arrests 5.8% and Part II arrests 9.6%. Upstate counties accounted for 60.4% of the Simple Assault arrests, 55.6% of the arrests for Sex Offenses, 68.6% of the Forgery arrests, and 55.6% of the arrests for Stolen Property.

Drug Arrests

Arrests for Drug offenses numbered 43,169 statewide in 1979, 56.3% reported from New York City and 43.7% Upstate. For the state, Drug arrests rose 5.1% with a 12.5% increase in New York City and 3.1% decrease Upstate. Arrests for sales were up 9.3% while possession arrests were up 3.9%.

Statewide, arrests for sale made up 22.9% of the Drug arrest total and arrest for possession made up 77.1%. Arrests for marijuana offenses accounted for 65.6% of all Drug arrests and arrests for possession of marijuana made up more than half of the Drug arrest total.

Combined arrests for sale and possession of opium, cocaine and their derivatives represented 22.3% of the arrests made for Drug offenses and were down 20.9% from the previous year. Arrests for sales were up 12.0% while arrests for possession fell 34.0%.

Driving Under the Influence

A total of 48,693 arrests were reported for Driving Under the Influence, 94.8% from the Upstate counties. Alcohol related offenses accounted for 99.0% of the arrest compared to 1.0% for drugs. Arrests for Driving Under the Influence showed a 1.3% rise from 1978 to 1979.

1/ Data are compiled from individual fingerprint records received at the Division of Criminal Justice Services pursuant to Section 160.20 of the Criminal Procedure Law.

INDICTMENTS AND DISPOSITIONS

The following tables present statistical data on New York State felony indictments and dispositions for 1978 and 1979. The information is obtained from a statistical reporting system based on individual reports of each indictment and each disposition submitted by District Attorneys and Special Prosecutors. The unit of count in the reporting system is the defendant/indictment. This includes all defendants indicted and all indictments processed as follows:

1. When several defendants are named in one proceeding or indictment, each defendant is counted separately.

2. When one defendant is named in multiple proceedings or indictments, each indictment is counted separately.

The tables focus on three major geographical areas of the state: New York City, the Suburban Area of New York City (Nassau, Rockland, Suffolk and Westchester counties) and Upstate. Similar information is also presented on the four Judicial Departments in New York State.

Tables of data are presented in three categories:

1. All Felony Charges

2. All Felony Drug Charges

3. Class A Drug Charges

The use of offender based statistics and the tracking of each case for each defendant from time of indictment until final disposition makes possible the measuring of elapsed time between various stages in processing. The median is obtained by ranking all the values in a specific category (for example, time from indictment to disposition) and choosing the middle number--that is the number with an equal amount of values above and below it. As a result, median values are not influenced by very large or very small numbers the way average values are.

It should be noted that the disposition data reported pertains to cases handled during the specified year. These dispositions may be for indictments in the same year or previous years.

Defendant-Indictments

In New York State in 1979 a total of 31,512 felony indictments were reported by District Attorneys and Special Prosecutors, a 1.4% increase over 1978. Although the percent increase is small, it is a reversal of a declining trend in indictments that began in 1975. Drug indictments registered a 3.2% increase during the same period, and accounted for 11.0% of all defendant indictments. Indictments for Class A drug offenses showed a 10.8% drop which may be partially attributed to revisions in the Penal Law effective September 1, 1979.

New York City accounted for more than half of the state indictments and over 60% of the drug indictments. Overall, New York City showed an increase of 5.2% in indictments.

The Suburban Area of New York City (Nassau, Rockland, Suffolk and Westchester counties) comprised 14.5% of the state total. This area registered a 17.3% drop in indictments from 1978 to 1979. Suffolk county was largely responsible for the decline in indictments in the Suburban Area of New York City. The decrease was attributable to more effective screening of cases and to the unusually large number of 1978 indictments.

Upstate accounted for one third of New York State indictments and showed a rise of 4.7%.

Dispositions

In New York State, dispositions of felony indictments totaled 30,257 in 1979 with convictions accounting for 24,535 or 81.1% of all dispositions. Convictions are generally on felony charges but also include some lesser offenses. All trials, both acquittals and convictions, made up 11.3% of dispositions in 1979, up from the 9.9% reported in 1978. Guilty pleas made up 90.4% of convictions and trials, jury and non-jury, the other 9.6%. Slightly more than 15% of convictions resulted in Youthful Offender adjudications.

Of the 24,535 convictions, 37.8% received sentences to state facilities, 24.3% to local institutions and 31.1% probation. For those convictions by plea, 34.4% received incarceration at state facilities, 25.3% to local institutions and 33.3% probation. Convictions as the result of trials showed sentences to state facilities at 70.7%, local institutions 15.1% and probation 10.4%. For statistical purposes, sentences of imprisonment and probation have been included in local institutions.

New York City disposed of 14,927 felony indictments in 1979, a drop of 3.4% from the 15,456 processed in 1978. Convictions represented 77.6% of the total dispositions, nearly the same as the 77.8% reported in 1978. The 2,121 dispositions by trials in 1979 represented a 11.5% increase over the 1,902 dispositions by trial in 1978. Trials accounted for 14.2% of the New York City dispositions in 1979 compared to 12.3% in 1978.

Guilty pleas comprised 87.6% of all convictions with jury and non-jury trials accounting for the remaining 12.4%. Youthful Offender adjudications applied to 9.3% of all convictions in New York City.

The Suburban Area of New York City disposed of 4,971 felony indictments in 1979, 3.0% below the 5,126 dispositions handled in 1978. At 88.8%, convictions continued to represent the largest segment of the total disposed.

Trials, involving acquittals and convictions, totaled 454, 9.2% of the disposition total in 1979. This was an increase of 15.8% in trials over the 392 reported in 1978 when trials comprised 7.6% of the total disposed.

Pleas of guilty made up 92.8% of the conviction total in 1979, down slightly from the 93.5% in 1978.

Of the 4,414 convictions, 27.4% received sentences to state facilities, 35.9% to local institutions and 32.1% sentences to probation.

Upstate counties registered a 3.0% increase in dispositions from 10,000 in 1978 to 10,303 in 1979. The Upstate conviction rate remained nearly constant at 82.5%.

Trials showed an increase of 11.5% from 1978 to 1979 up from 741 to 826. In 1979, 8.0% of the Upstate dispositions were arrived at by trial.

Guilty pleas made up 93.0% of all convictions, with jury and non-jury trials making up the additional 7.0%.

Drug Dispositions

Statewide, dispositions of felony drug indictments totaled 3,320, almost the same as the 3,316 reported for 1978. The conviction rate of 79.0% in 1979 reflected a small increase over the 77.6% for 1978.

In 1979, trials on felony drug indictments decreased 5.3% from 1978. The number acquitted dropped from 75 in 1978 to 50 in 1979, a decrease of 33.3%. A total of 302 cases were disposed of by trial in 1979, with 16.6% acquitted and 83.4% convicted. This is a significant change from 1978 when 319 trials resulted in 23.5% acquitted and 76.5% convicted.

Of the 2,622 convictions, 67.1% received sentences of incarceration, compared to 62.2% for all charges. Youthful Offender adjudications represented 8.1% of the convictions on felony drug indictments versus 15.2% for convictions on all felony indictments.

Statewide, Class A drug dispositions numbered 2,065 in 1979, 62.2% of all drug dispositions. Convictions numbered 1,630, 78.9% of the total dispositions and only 5.0% of these convictions were adjudicated Youthful Offenders.

Trials, resulting in either acquittal or conviction, declined from 266 in 1978 to 246 in 1979, a drop of 7.5%.

Incarceration, either state or local, was specified for 82.0% of all convictions and for 95.1% of those cases convicted by trial.

Processing Time

The median time for processing indictments to dispositions in New York State was 120 days. Convicted cases took 104 days and the median time to sentence was 155 days.

In 1979, drug cases had a median time of 185 days from indictment to disposition, a decline from the 209 days reported for 1978. Class A drug dispositions also recorded a decrease in the median time from indictment to disposition, 226 days in 1979 versus 236 days in 1978.

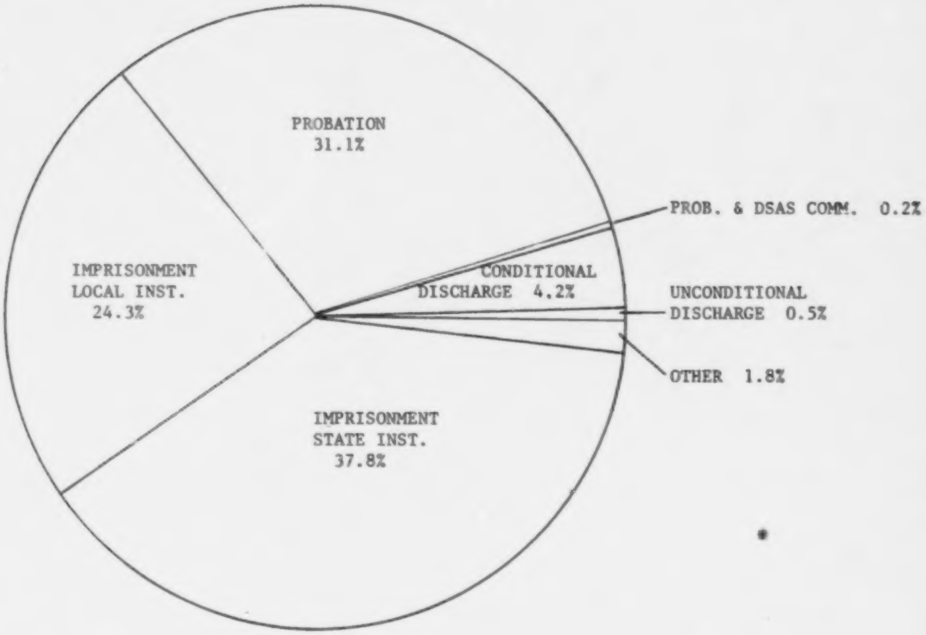
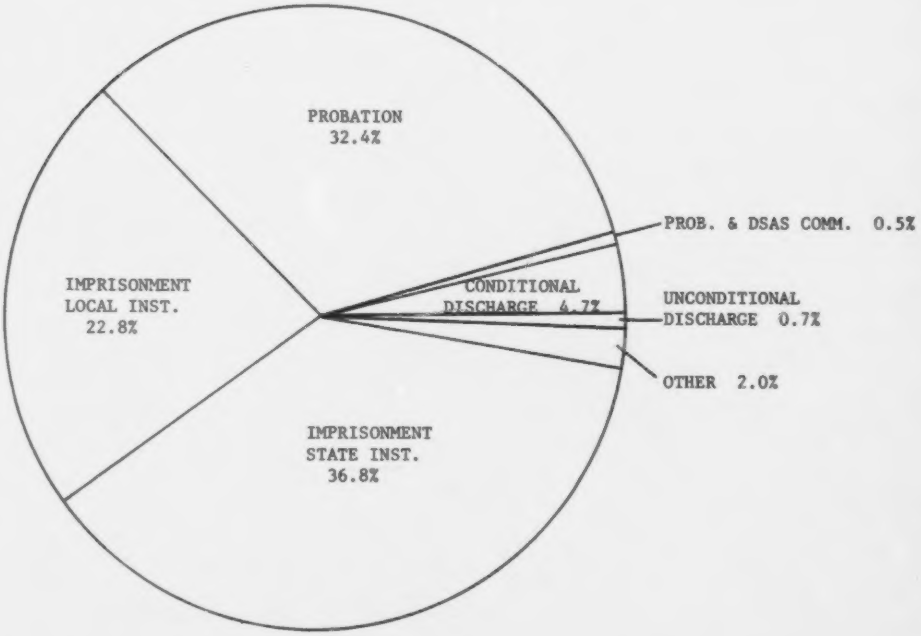
SENTENCES FOR CONVICTIONS OF FELONY DEFENDANT-INDICTMENTS
NEW YORK STATE
1979 - 1978

1979



1978



Notes

SENTENCES

Sentences for Murder, Rape, Robbery, Aggravated Assault, Burglary and Larceny and attempts at these crimes are compared for 1978 and 1979 in the following tables. These comparisons include type of sentence, length of maximum sentence to state correctional facilities and maximum length of probation supervision. Youthful Offender status may have a mitigating effect on sentences while second and persistent felony convictions have an exacerbating effect. As indicated on page 165 of this report, in 1979, Youthful Offenders accounted for 15.2% of all convictions, Second and Persistent Felony Offenders made up 9.1%.

The percentage of sentences to state prison for these serious offenses was the same for both years, almost 48%. The proportion of sentences to local institutions and probation varied less than 1% between the two years.

Excluding Murder offenses, convictions on Robbery offenses were most likely to result in state prison sentences. Sentences for Robbery accounted for 52% of the total sentences to state prison. Of the selected offenses, Burglary convictions most frequently resulted in sentences of probation and made up 47% of the probation total. The percentage of sentences to local institutions was highest for Burglary 3rd° and attempts of Burglary 3rd° and these offenses represented 45% of the sentences to local imprisonment.

For these selected offenses, there were 6,206 state prison sentences in 1979 compared to 6,054 in 1978. Maximum sentences of three to four years made up 46% of the sentences in 1979 compared to 52% in 1978. Sentences with maximum ranging from five to twenty five years increased from 44% to 50% during the same period. Life sentences increased from 185 and 3% of the total in 1978 to 238 and 4% of the total in 1979.

COMPARISON OF ACTIVITY AT VARIOUS CRIMINAL JUSTICE TRANSACTION POINTS

In this comparison we have examined the offenses of Homicide, Robbery and Drugs as the cases are reported at various points in the criminal justice system. Data shown for these offenses are obtained from several sources. Offenses and arrests statistics are compiled from monthly Uniform Crime Reports submitted to the Division of Criminal Justice Services by police agencies in New York State. The "Drug Arrest Charges" data are obtained from fingerprint cards submitted to the Division in accordance with Section 160.20 of the Criminal Procedure Law, reflecting all felony Drug charges rather than persons arrested for Drug felonies. Data on indictment through sentence are provided on individual reports by District Attorneys and Special Prosecutors in New York State and the unit of count is defendant-indictments.

Data on indictment through sentence are not necessarily for arrests and offenses within the same year. Disposition data will also reflect indictment data from previous years.

Homicide

From offense through sentence, all stages of the Homicide chart show 1979 data up from the previous year. In both 1979 and 1978, Homicide indictments surpassed Homicide arrests. This may be accounted for by several indictments being lodged against one defendant.

In 1979, 79.1% of the convictions based on Homicide indictments received prison sentences, compared to 76.6% in 1978. For those cases where the conviction charge was Homicide, 83.1% were sentenced to state prison in 1979 versus 81.1% in 1978.

Robbery

From 1978 to 1979, the Robbery category reflected increases at all points, from offense through sentence. Over 80% of Robbery dispositions resulted in conviction with 60.3% of the convictions resulting in sentences to state institutions. Of the 5,328 convictions on Robbery or lesser charges, 92.1% were for Robbery. For convictions on Robbery charges, 65.1% of the sentences were to state institutions.

Drug Felonies

Convictions based on Class A indictments accounted for 62.2% of the Drug convictions. Of the 1,630 convictions for Class A indictments, 57.7% received sentences to state institutions compared to 12.8% for other felony Drug indictments.

NEW YORK STATE
VIOLENT FELONY WARRANT PROCESSING
1979

The Statistical Analysis Center (SAC) of the Division of Criminal Justice Services has analyzed data on the processing of violent felony warrants as part of a statewide program to improve enforcement of these warrants. (A violent felony warrant is a warrant issued on an offender who is accused of committing one of eighteen serious offenses in New York State Penal Law.) The data were obtained from the automated DCJS wanted data system and the analysis covers warrant processing through December 30, 1979.

In the tables which follow, "program" warrants are those warrants issued after January 1, 1979, the date the Violent Felony Warrant Enforcement Program began. Warrants issued prior to that date are labelled "pre-program" warrants. Metropolitan Planning Areas (MPA's) are major population areas of the State which account for a high proportion of the State's criminal activity. Multi-location Agencies are law enforcement agencies that have jurisdiction in more than one county within the State. (The specific areas and agencies are shown in the tables.)

Data on the volume of violent felony warrants issued and cleared in the State are summarized below.

Basic Offender Characteristics

Table 1 presents general age, sex, and race breakdowns for program warrant offenders in 1979. Statewide, the population of warrant offenders is young (75% are under 30) and overwhelmingly male (92%). A slight majority (52%) are black.

Offenders from multi-location agencies are more likely to be older than those in other jurisdictions. Forty-three percent are of age 30 or older and the mean age is 30 years. In other jurisdictions, the corresponding proportion is 23 percent or 25 percent and the mean age is 25 or 26 years. The predominance of males over females holds true in all areas. Blacks constitute the majority in New York City and the minority in other jurisdictions. Statewide distribution patterns tend to mirror those of New York City which contributes a dominant proportion of State totals.

Warrant Activity

Table 2 summarizes violent felony warrant enforcement activity during the first year of the program. It shows program warrants issued and cleared and those remaining active on the last day of the period. Cleared and active "pre-program" warrants are shown as well. Data are broken down by offense type and by the principal geographic areas of the State.

Eight-thousand nine-hundred and seventy-seven (8,977) violent felony program warrants were issued in New York State during 1979.[1] Of these, 5,648 or 62.9%, were cleared leaving 3,329 active on December 30, 1979. Three-quarters (75%) of these issuances were from New York City, as were 76.2% of the clearances. The Metropolitan Planning Areas outside New York City accounted for an additional 13.3% of both clearances and issuances.

From those warrants which were issued prior to 1979, or pre-program warrants, an additional 2,063 were cleared during the year. Six thousand two-hundred and nineteen (6,219) of these warrants were active at the end of the period. The total number of active violent felony warrants (i.e. program and pre-program) at the end of the year was 9,548.

A more detailed examination of program warrant activity follows.

1. Issuances

The characteristics of program warrants issued throughout the State in 1979 are presented in Tables 3 and 4.

---

[1] Where New York State Penal Law citations were not supplied with warrants transmitted to the wanted system, the National Crime Information Center (NCIC) offense code was used to identify violent felony warrants. However, the NCIC codes are generally less precise than the Penal Law citation as descriptors of violent felony offenses. It is possible, therefore, for some non-violent felonies to be included in these totals.

a. Offense: Violent felony offenses include fourteen first and second degree designations for assault, kidnapping, burglary, arson, robbery and criminal possession of a dangerous weapon and four first degree designations for manslaughter, rape, sodomy and sexual abuse. For purposes of study, the eighteen individual offenses were collapsed into eight functional categories, shown in the tables as offense "types" and identified by the three-digit article notation of the Penal Law, e.g. "120 Assault."

Offense is the most serious charge for which the offender is wanted at the time of issuance of the warrant.

Data on 1979 issuances show that, of the eight major offense types constituting violent felony offenses, those for assault, burglary and robbery predominate. This is true in all principal areas of the State. In New York City, warrants for these offenses comprise 83% of all issuances; in the MPA's it is 84% and in "Other" areas, 81%.

Robbery warrants predominate in New York City (almost 40%) and in warrants from the multi-location agencies (48%). Burglary is the most numerous warrant offense type in the MPA's and assault in the "Other" areas.

Relatively few warrants (only about 6%) are issued for kidnapping, arson, and sexual offenses Statewide.

b. Monthly Trends: Statewide, more violent felony warrants were issued in October than in any other month in 1979. The number of issuances for that month was 1,092, representing 12% of the year's total. October was the peak month in all geographic areas of the State; August was the peak for multi-location agencies. In the areas outside of New York City, March was also a relatively heavy month for issuances; in the City, September and November were also high.

The number of issuances was lowest in December with 386 or 4 percent of all issuances. However, delays in entering cases into the warrant system may be responsible for this low December figure.[2] Issuances were also generally low in the summer months of June, July and August.

Computations from the data show that Statewide an average of 829 new program warrants were issued per month in 1979.[3] New York City accounted for 627 of that number.

Program warrant issuances increased at an average rate of 2 percent per month in 1979. For New York City and "Other" areas, the average rate of growth was about 5 percent per month. A reverse trend can be seen for the MPA's outside New York City which registered an average decline of 3 percent per month. Month to month changes do not appear to show consistent patterns.

2. Clearances

Data on the volume of clearances are contained in Tables 5 and 6. As with issuances, these are broken down by offense and month of clearance for each of the major areas of the State.

a. Offense: The offense distribution of clearances (Table 5) is very similar to that of issuances shown in Table 3. This suggests that in each of the principal areas of the State, warrant enforcement activities were not directed toward any special type or group of offenses. As with issuances, warrants for assault, burglary and robbery constitute the bulk of offenses (84% Statewide) which were cleared.

b. Monthly Trends: It can be seen from Table 6 that the peak month for clearances was December in New York City, October for the non-City areas and August for the Multi-location agencies. Again the Statewide totals tend to mirror the New York City figures because the City accounts for a large proportion of the State's volume.

Calculations from the data reveal that an average of 517 warrants were cleared Statewide each month. New York City contributed 386 to that number (see note 2, below).

---

[2] Other factors which may affect low December issuances could be reduced productivity during the holiday season and the loss of one day's transactions at the end of the month.

[3] Data for January, February and December are excluded from the calculation of averages and rates of growth. (January and February data are incomplete because the wanted system was not modified to retain cancelled cases until February 13, 1979. December data are incomplete due to delays in entering warrants into the automated wanted system.)

Month to month fluctuation in the numbers of program warrants cleared is erratic both in the amount and the direction of these changes. The date of cancellation is the date that the cancellation notice (transmitted by the enforcing agency) is recorded on the DCJS warrant system. As such, this variable is influenced by the ability of these agencies to transmit data to DCJS, as well as the date the offender is apprehended and other factors.

In summary, the data show a high volume of violent felony warrant activity in the State with almost 9,000 such warrants issued during 1979 and more than 5,600 cleared. About three-quarters of this activity occurred in New York City. The most common warrant offense is robbery in New York City and burglary in the areas outside the City. For additional information on the processing of Violent Felony Warrants in New York State see the Third Report on the Implementation of the Statewide Violent Felony Warrant Enforcement Program, New York State, Division of Criminal Justice Services, April 1, 1980.

ARSON INCIDENT STATISTICS, NEW YORK STATE 1979

This analysis of arsons in New York State inaugurates a report series on this offense by the Statistical Analysis Center (SAC). The data are derived from a new aggregate arson data collection program begun in 1979 through the Uniform Crime Reporting (UCR) System.

Arsons reported under Part II of the UCR program and shown elsewhere in this volume are reported under the "hierarchy rule" by which the offense is counted only if it is the most serious in an incident. Under this program, an arson offense is reported regardless of whether it occurred in conjunction with a more serious offense. This analysis, therefore, shows more arson offenses than are shown for arson under Part II.

The new reporting system was initiated in April of 1979 with jurisdictions asked to report retroactively to January 1979. Because of unfamiliarity with the new system on the part of reporting agencies and incomplete retroactive reporting, data covering the first half of the year should be interpreted with some caution. Individual monthly breakdowns are not presented for this period because only aggregated data were available from many jurisdictions. Also, estimated values of property damaged were not uniformly reported during the year and were therefore not analyzed.

In the tables which follow, reported and cleared arson incidents are broken down by geographic area, by the type of property and by month of occurrence. "Incidents reported" are only those which are found to constitute arson after investigation by police, fire or other agencies. A "clearance" is defined as an offense in which the perpetrator has been taken into custody or is otherwise known to have committed the crime by police. "Metropolitan Planning Areas" (MPA's) are major population areas of the State in which there is a relatively high proportion of the State's crime activity. The specific areas are noted in the footnotes to the tables. "Other" areas of the State are the primarily rural areas outside of New York City and the MPA's. Type of property is broken into "structural," (including residential, commercial and "other"), "mobile," and "other property." These are more fully defined in the footnotes following the data tables.

ARSONS REPORTED

There were 11,739 arson incidents reported in New York State in 1979. Slightly more than 8,000 of these, or almost 69%, occurred in New York City. Arsons of structures account for an overwhelming proportion (91%) of arson incidents and in the City, the proportion is even higher (98.3%). Structure arsons account for about three-fourths of all arsons in the non-City areas of the State. (In this analysis, the Statewide totals will tend to mirror those for New York City because of the large proportion of the total volume accounted for by the City.)

Among residential structures, New York City shows a higher proportion of arsons of multi-occupancy structures (such as apartments, tenements, hotels, etc.) than of single-occupancy structures. This relationship is reversed in the non-City areas. Among commercial arsons, New York City shows a higher proportion in the "other" category (stores, restaurants and offices) than non-City areas and a lower proportion in the "storage" category.

While structure arsons are more common in the City than in the rest of the State, arson of "mobile" property is less common. Less than two percent of City arsons fall in this category, compared to almost twenty-three (23%) of non-City arsons (Table 1).

The number of arsons reported by month (for the last half of the year) is relatively stable. The peak month in New York City was September in which 762 arsons were reported. In the non-City areas, it was October when 438 were reported (Table 1).

Table 2 highlights arsons of abandoned structures. Calculations from the data in Tables 1 and 2 reveal that slightly more than one-fourth (25.7%) of all arsons Statewide involve abandoned structures. The proportion for New York City is 29.9%. For the Metropolitan Planning Areas it is 18.1%, and for "Other" areas it is 12.7%.

Statewide, residential structures are the most common form of abandoned structure to be targets of arson with the likelihood greater in New York City than in the non-City areas. Arsons of abandoned multi-occupancy residences are about eight times more common in the City than elsewhere in the State. Arsons of abandoned commercial structures are less common in the City.

In the City, arsons of abandoned structures show a decline from the third to the fourth calendar quarter. There is no similar pattern outside the City.

ARSON CLEARANCES

Arson clearances totaled 1,077 in 1979, representing an overall clearance rate of just over 9% (see Tables 3 and 4). This no doubt reflects the extreme difficulty involved in investigating a crime in which most of the physical evidence is destroyed.

Statewide, the distribution of clearances by property type in Table 3 is very similar to that of arsons reported in Table 1, particularly for residential and commercial structures. Some differences do appear, however, when the property-type distributions are examined for the different areas of the State.

The distribution of clearances by area is very different than that for reported arsons. Clearances outside New York City surpassed those in the City by almost two-to-one. In all categories of property except "other residential" (multi-occupancy dwellings), clearances were far more numerous in areas outside the City.

Monthly distributions show a sharp peak in July in the City and relative stability for the remainder of the year. (This may be a function of a shift from cumulative to monthly reporting which occurred in some jurisdictions beginning in July.) Monthly variation is generally less dramatic outside of New York City although there appears to be a slight fall-off for the last month of each of the two quarters reported (i.e. in September and December).

Table 4 presents clearance rates for each area of the State broken down by type of property and quarter. The clearance rate is the ratio of clearances to the total number of arsons reported, expressed as a percent. Because a 1979 clearance does not necessarily reflect clearance of an offense reported in 1979, clearance rate should be considered a general indicator of processing efficiency.

Clearance rate shows considerable variation by area. The rural (i.e. "other") areas of the State show the highest clearance rate (23.6%), the Metropolitan Planning Area rate is 16.9%, and New York City is 4.7%.

Rates also vary according to type of property. Motor vehicle arson has the lowest clearance rate at 4.9% (Statewide) while the "other property" category (crops, timber, etc.) has the highest at 33.7%. The latter category is uniform across each of the three principal areas of the State.

Among the subcategories of structural arson, the clearance rate for residential (8.0%) and commercial (9.3%) are of the same magnitude as are public and community (20.0%) and other structural (23.6%). The lower clearance rates for residential and commercial arson vis-a-vis "public/community" and "other structural" arson appear to hold more strongly in New York City than outside New York City (Table 4).

In Table 5 are shown arson clearances involving persons under age 18. Comparison with the overall clearance data in Table 3 show that Statewide, 31.4% of all clearances involve persons in this age group. In New York City, the percentage is only 18% while for the areas outside the City, it is 38.8%. By property type, the percentage of clearances involving youth under 18 is highest for "public and other" structures (67.1%) and lowest for residential structures (21.9%). Non-City clearances for this age group outnumbered those in the City by almost four-to-one, a pattern even more extreme than that for overall clearances shown in Table 3.

From Table 5 it can be seen that there were no "under 18" clearances for "mobile" and "other property" arsons in New York City. Similarly, none were reported in the City for the months of August and September and only one each in the last three months of the year. This represents a sharp decrease from the first two quarters of the year when a total of 56 were recorded. Outside the City, the pattern is somewhat more stable although there is variation within the last two calendar quarters.

In summary, almost 12,000 arson incidents were reported in New York State in 1979 of which 69% occurred in New York City. The vast majority of arsons are of structures with more than one quarter of these being abandoned.

Although relatively low overall, clearance rates were highest in the rural (i.e. "other") areas of the State and lowest in New York City.

Future reports in this series will explore other facets of this offense including changing patterns in reporting and clearances over time.

LIST OF FOOTNOTES
For Arson Tables 1-5

[a] Includes Erie, Monroe, Nassau, Onondaga, Suffolk and Westchester counties.

[b] Includes apartments, tenements, flats, hotels, motels, inns, dormitories and boarding houses.

[c] Includes warehouses, garages and barns.

[d] Includes stores, restaurants and offices.

[e] Includes churches, jails, schools, colleges and hospitals.

[f] Includes out-buildings, monuments and structures under construction.

[g] Includes churches, jails, schools, colleges, hospitals, out-buildings, monuments and structures under construction.

[h] Includes motor vehicles, airplanes, boats, trailers and recreational vehicles.

[i] Includes airplanes, boats, trailers and recreational vehicles.

[j] Includes crops, timber, fences and signs.

[k] Separate data are not available for January-March and April-June. They are shown combined.

LAW ENFORCEMENT OFFICERS KILLED OR ASSAULTED

In New York State in 1979, seven law enforcement officers were killed in the line of duty. In addition, 5,302 officers were assaulted while performing their law enforcement functions. The number of officers killed rose from 1978 when five officers were slain. Conversely, the number of officers assaulted in 1979 was 5,302, which represents a slight decrease from the 5,821 reported in 1978. This section of the report analyzes the circumstances surrounding those assaults. In 1979, 81 percent of the assaults resulted in injuries to the officers.

Weapons

As in 1978, physical force was the method most used in assaulting officers -- 81.1 percent. Handguns and knives were used 5.5 percent and 4 percent respectively in the assaults, other firearms 1.2 percent, and other dangerous weapons accounted for 8.2 percent.

Activity

"Attempting Arrests" was the activity which led to the greatest number of assaults -- 38.6 percent. "Responding to Disturbance Calls" -- 15.6 percent, "Handling Prisoners" -- 9.6 percent, and "Handling Mentally Deranged Persons" -- 8 percent — were the next highest in frequency.

Assignment

Police officers assigned to two-man vehicles were once again the most frequent victims of assault -- 47 percent -- as compared to 12 percent for those assigned to one-man vehicles, 11 percent for detectives or special assignments, and 30 percent for all other assignments.

Time

Almost 51 percent of the assaults occurred between the hours of 6:00 PM and 2:00 AM -- the hours when police are usually at their busiest. The eight-hour period between 4:00 AM and 12:00 NOON showed the lowest rate of assaults -- 16 percent.

LAW ENFORCEMENT EMPLOYEES

Law enforcement agencies in 1979 reported a total of 65,428 persons -- uniformed and civilian, full and part time -- were employed. This represents a decrease of three percent over the number of employees in 1978. The largest department was, of course, the New York City Police Department with 28,012 employees. The next largest departments, in order of size, were the State Police with 4,029, Nassau County Police with 4,010, Transit Authority Police with 2,952, and Suffolk County Police with 2,869.

A total of 86 percent of the employees statewide were uniformed officers of whom 96 percent were employed full time. Two percent of the uniformed personnel were females. Fourteen percent of the employees were civilian -- a decrease of one percent over 1978 figures.

A total of 4,414 persons were employed by sheriff departments across New York State in 1979, a decrease of nearly seven and a half percent over the previous year. One half of the decrease (3.5 percent) can be attributed to the fact that the Westchester County Sheriff's Department was merged with the Westchester County Parkway Police to form the Westchester County Department of Public Safety. Of all the sheriff personnel, 84 percent were uniformed and 16 percent were civilians. A total of 7,187 persons were employed by special police agencies; such as: authorities (transit, housing, port), parks, railroads, university campus, etc. This figure represents a decrease of almost three percent over 1978.

LAW ENFORCEMENT EXPENDITURES

During 1979, approximately 92 percent of the state's law enforcement agencies submitted an estimate of their operating expenditures for the year. The combined figures totalled $1,436,433,732 of which $674,248,284 was expended by the New York City Police Department; $472,549,595 by the other municipal police agencies; $119,265,744 by the specialized police agencies (authorities, railroads, parks, universities, etc.); $85,069,800 by the New York State Police; and $85,300,309 by county sheriff's departments.

In Memorian

The Division of Criminal Justice Services joins the criminal justice community of New York State in extending its sincere sympathy to the families of the following law enforcement officers who gave their lives in the performance of protecting and serving the citizens of their communities during 1979:

* * * * * * *

TED DONALD	New York City Housing Authority Police Department
EDWIN FOGEL	New York City Police Department
KIERAN J. GRANT	Westchester County Sheriff's Department
MELVIN HOPKINS	New York City Police Department
WILLIAM KOENIGE	Schenectady Police Department
MICHAEL RUSSELL	New York City Police Department
THOMAS SCHIMENTI	New York City Police Department

OFFICE OF COURT ADMINISTRATION

COURT OPERATIONS

The Office of Court Administration (OCA) publishes a report annually reflecting the operations of the courts in New York State. We have selected a number of the tables presented in that report which complement the data gathered and reported by DCJS and with the consent of OCA present them hereunder.

THE COURT OF APPEALS

The Court of Appeals is the highest court of the State. In 1979, 645 records on appeal were filed in the Court of Appeals. During this period, 1,822 appeals and motions were decided. The Court also heard oral arguments in 607 cases and decided 1,627 applications for leave to appeal.

Of the 570 appeals decided, 423 involved civil matters and 147 were criminal cases, as shown in Table OCA-I. The basis of jurisdiction in the Court of Appeals in 291 (69%) of the civil appeals disposed of was a reversal, modification, or dissent in the Appellate Divisions. Eighty (19%) of the civil appeals were heard by permission of either the Appellate Divisions or the Court of Appeals.

In the 423 civil appeals disposed of, 268 (63%) judgments or orders were affirmed, 102 (24%) reversed, 29 (7%) modified, and 24 (6%) dismissed. Among the 147 criminal appeals disposed of, 82 (56%) judgments were affirmed, 55 (37%) reversed, and 6 (4%) modified.

In deciding the 570 appeals, judges of the Court of Appeals wrote 512 opinions. These consisted of 424 opinions of the Court, 15 concurring opinions and 73 dissenting opinions.

APPELLATE DIVISIONS OF THE SUPREME COURT

The Appellate Divisions provide the first level of appeal from superior trial courts in addition to performing other functions. In 1979, 8,418 records on appeal were filed in the four Appellate Divisions. There were 9,065 dispositions of judgments or orders appealed from, and the Appellate Divisions heard 4,258 oral arguments.

Of the 9,065 dispositions, 6,074 (67%) were affirmances, 765 (8%) were modifications, 1,351 (15%) were reversals without a new trial, and 136 (2%) were orders of new trials, as shown in Table OCA-II.

In disposing of the 9,065 judgments or orders appealed from, the four Appellate Divisions wrote 561 full opinions, 89 per curiam opinions and 4,132 memorandum opinions.

APPELLATE TERMS OF THE SUPREME COURT

The Appellate Terms of the Supreme Court received 2,035 appeals and disposed of 1,499 in 1979, as shown in Table OCA-III. The First and Second Departments together rendered 1,107 decisions, filed 1,032 per curiam opinions and wrote 31 memoranda (not filed). 3,196 motions were heard or submitted.

CRIMINAL PROCEEDINGS

A total of 8,918 felony defendant-indictments were awaiting disposition of their cases in Supreme Court in New York City at the end of 1979. This compares with 8,608 pending at the end of 1978. A breakdown of these defendants by county is presented in Table OCA-IV.

The New York City Department of Correction reports that, at the end of December 1979, a total of 3,111 defendants were being detained while awaiting disposition or sentencing in Supreme Court in New York City. Of these, 79 had been detained for over one year. This is a decrease from 82 defendants reported as detained for more than one year on December 31, 1978. Table OCA-V shows the number and percent detained by county.

The Supreme Court and County Courts Outside the City of New York

As reported by local detention facilities, 966 detainees were awaiting action in Supreme Court and County Courts outside the City of New York at the end of December 31, 1979. Of these, 14 had been detained over one year. This compares with 1,094 detainees awaiting action in the same courts at the end of 1978 - 20 for over one year. Table OCA-VI shows the number of defendants detained by judicial district.

The Criminal Court of the City of New York

With an authorized strength of 98 judges, the Criminal Court of the City of New York has jurisdiction over misdemeanors and lesser criminal offenses. It is also the arraignment court for felonies.

Table OCA-VIII summarizes the court's activities in arrest cases for 1979. The total number of filings during 1979 was 203,367, compared with 224,109 filings in 1978.

There were 200,456 cases disposed of in 1979, compared with 218,623 dispositions in 1978. Table OCA-IX presents a listing of dispositions by number and percent by county for these two years.

According to the New York City Department of Correction, 1,214 defendants were detained while awaiting action in Criminal Court of the City of New York at the end of 1979. This included 260 defendants detained over 30 days. The comparable figure for the end of 1978 was 322 defendants. Table OCA-VII lists the number of detainees at the end of 1978 and 1979 by stage of processing.

Family Court - Persons in Need of Supervision Proceedings

In 5,952, or 60 percent of the original supervision petitions disposed of during 1979, there was no adjudication that the person was in need of supervision, as shown in Tables OCA-X and OCA-XI. In 330, or 3 percent of the cases an adjudication was made, but judgment was suspended or the respondent was discharged with a warning. 2,435 or 24 percent of the supervision proceedings culminated in an order or probation. Proceedings that resulted in some form of placement occurred in 1,221 or 12 percent of the cases.

A slightly higher percentage of cases involving girls resulted in no adjudication that the person was in need of supervision than cases involving boys. A higher percentage of cases in which the judgment was suspended or the respondent discharged with a warning occurred in counties outside the City of New York (5%) than in New York City (1%). Probation also was used in a greater percentage of cases in counties outside the City of New York (33%) than in New York City (5%).

Family Court - Juvenile Delinquency Proceedings

During 1979, 17,880 original juvenile delinquency cases were disposed of in the Family Courts. As in previous years, a much higher percentage of the delinquency proceedings involved boys (88%) than girls (12%).

In 11,811, or 67 percent of the original juvenile delinquency petitions disposed of during 1979, there was no adjudication of delinquency, as shown in Tables OCA-XIII. In 726, or 4 percent of the cases an adjudication was made, but judgment was suspended or the respondent was discharged with a warning. 19 percent, or 3,359, of the proceedings culminated in an order of probation. Proceedings that resulted in some form of placement occurred in 1,759, or 10 percent of the cases. 3 percent, or 553 cases, resulted in a discharge of the delinquency petition to another petition or in a discharge to a mental hygiene institution or school for defectives.

A higher percentage of cases involving girls (75%) than boys (66%) resulted in no adjudication of delinquency. A slightly higher percentage of cases in which the judgment was suspended or the respondent discharged with a warning occurred in counties outside of the City of New York (5%) than in New York City (2%). Probation also was used in a greater percentage of cases in counties outside the City of New York (21%) than in New York City (11%).

The distribution of the reasons reported for delinquency petitions during 1979, shown in Table OCA-XIV, was substantially the same as in previous years. Allegations of robbery were more frequent, however, in New York City than outside New York City, and allegations of burglary and larceny (not of an auto) were the basis of a greater percentage of delinquency petitions in counties outside New York City than in the City.

DISTRICT COURTS AND THE COURTS IN CITIES OUTSIDE THE CITY OF NEW YORK

In criminal cases in 1979, these Upstate courts reported 169,811 arraignments, 132,588 dispositions and 73,421 convictions. Table OCA-XV presents a breakdown of arraignment and dispositions by District and Judicial Departments.

TOWN COURTS AND VILLAGE COURTS

These courts handled 1,905,928 criminal cases in 1977 of which 94,528 were Penal Law and indictable offenses. As Table OCA-XVI shows, both these figures represent increases over the previous year.

PROBATION

The New York State Division of Probation publishes data annually describing the workload of probation agencies in New York State. We have selected a number of tables and charts presented in that report, entitled the "Statistical Supplement to the Annual Report" which highlight probation activities and complement the data gathered and reported by DCJS.

With the consent of the Division of Probation, we present, hereunder, these "Highlights of Probation", together with selected tabular and graphic material reflecting various aspects of probation activity.

HIGHLIGHTS OF 1979

BASED ON

ANNUAL REPORTS OF WORKLOAD IN PROBATION DEPARTMENTS

Family Intake

Cases opened for intake services increased from 127,712 in 1978 to 128,044 in 1979.

Cases adjusted by probation officers increased 1% from (31,133 in 1978 to 31,440 in 1979).

Investigations

Regular investigations (J.D., PINS, Pre-Plea, Pre-Sentence) completed increased 5% (from 72,518 in 1978 to 75,877 in 1979).

Pre-Disposition Supervision

Supervision of Upstate* clients before court disposition increased from 11,572 in 1978 to 12,077. Overall, pre-disposition supervision cases Upstate rose 4% with a 20% increase in Family Court and a 16% decrease in Criminal Court.

Probation Supervision

The number of probationers increased 5% during the year (64,196 January 1 and 67,656 December 31).

The number of persons received for probation supervision Upstate increased 8% (from 25,499 in 1978 to 27,605 in 1979). The number passed from supervision Upstate decreased from 24,419 in 1978 to 23,719 in 1979.

The number of probationers from Upstate criminal courts at the end of each year has been increasing since 1973 and the number of 1979 cases (31,462) continued to reflect this trend although the numeric increase was small. The number of probationers from New York City criminal courts showed a 7% decrease, from 25,888 in 1978 to 23,968 in 1979.

The number of probationers on whom violations were filed in Upstate criminal courts in 1979 showed new charges and absconders decreasing from 1978 while technical violations were up. In New York City, new charges were up while absconders and technical violations were down.

Upstate, 9% of felony probation supervision cases completed without revocation were discharged during the first year; in New York City, 3% were discharged during the first year.

31% of Upstate felony probationers who completed probation without revocation were discharged after more than three years of supervision; 60% of New York City felony probationers who completed probation without revocation were discharged after more than three years of supervision.

*Upstate is defined as all New York State excluding New York City.

CORRECTIONAL SERVICES

The New York State Department of Correctional Services has made available for inclusion in the 1979 Annual Crime and Justice Report data concerning admissions to department custody, inmates under custody, and releases from department custody. These data complement other data contained in this report and should provide a better understanding of the criminal justice process.

Under Custody Population

The number of inmates under custody declined from 12,998 at the beginning of calendar year 1970 to a low of 12,444 at the close of 1972. This decline began in 1964 and continued over a nine-year period. Contributing to this decline was the Baxtrom decision which let to the release from Department custody of all criminally insane inmates held beyond their maximum expiration dates along with related decisions which ended the practice of holding under custody dangerously mentally incapacitated persons for long periods of time. These decisions coupled with other factors including a revised Penal Law which became effective in September of 1967, changes in sentencing procedures, and the development of major institutional program for drug addicts by the state's drug control agency, resulted in an annual net loss in the under custody population which continued through 1972. This situation was reversed in 1973 when admissions exceeded releases for the first time since 1963 and this rise has continued through 1978 when the under custody population rose to 20,895, an increase of 67.9 percent over a seven-year period.

Admissions to Department Custody

Admissions registered a steady rise from an annual total of 6,762 in 1970 to a peak of 10,318 in 1977. The number of admissions in 1978 fell to 8,872 but then rose in 1979 to 9,507. The high number of 1976 and 1977 admissions reflected efforts by the Office of Court Administration to reduce a large backlog of serious felony cases pending before the Supreme Court which resulted in the temporary acceleration of the already high and rising rate of court commitments. Court commitments account for eight of ten admissions and trends in this category largely shape the flow of offenders into State prisons. Court commitments declined in 4,250 in 1970. From this 1970 low, commitments have risen to a high of 8,437 in 1977, an increase of 98.5 percent. Beginning in 1971, felony commitments rose rapidly, offsetting declines in other types of commitments. Contributing to this trend has been a rise in felony arrests and court dispositions and an increasing tendency of the courts to commit convicted felons to state correctional facilities. Several more stringent laws enacted in 1973 have added to this increase in commitments. These include the Second Felony Offender Law, which has imposed mandatory indeterminate sentences on such offenders; a drug law which has imposed harsher penalties on drug offenders; and the law imposing mandatory indeterminate terms for all Class B felonies and for certain Class C and D felonies. The trend toward increased court commitments is expected to continue into 1980 reflecting the impact of the violent felony offender legislation which became effective in September, 1978.

Releases from Department Custody

Releases from DOCS custody remained relatively stable during the six-year period, 1970-1975, averaging 7,285 annually. In 1976 a sharp rise in releases is observed, up 10% over the previous year. This substantial rise reflected a growth in the pool of parole eligible inmates in the burgeoning inmate population who were subsequently released to parole supervision. 1978 saw a temporary drop in releases which reflected longer minimum periods of incarceration being set by the Board of Parole and a modest shift toward longer sentences on the part of the courts, both of which lessened the number of paroles. Releases for 1979 resumed an upward trend including all time high volumes of paroles and conditional releases.

Board Activity

Figure 1 depicts the volume and type of hearings held by the Board of Parole in 1979 as compared with that of 1978 and 1977. The Minimum Period of Imprisonment Hearings (MPI) dropped drastically from 6,247 in 1978 to 3,180 in 1979. The dramatic drop relates to a 1978 revision in the law, which required that a MPI hearing be conducted within 120 days from the date on which an individual is received in a correctional institution (Executive Law, 259-i). Prior to January 1, 1978, MPI hearings were conducted within the tenth month of admission to an institution. The revised time frame plus the fact that a majority of MPI hearings in 1978 were actually conducted within 90 days resulted in the increased volume of MPI hearings for the year of 1978. It is important to note that the number of MPI hearings in 1979 resembles the amount of hearings prior to the 1978 revision. In 1977 there were 3,553 MPI hearings and in 1979 there were 3,180. The overall number of release hearings for 1979, 1978 and 1977 includes initial parole release hearings (State), local release hearings, State reappearance hearings, re-release hearings for violators and experimental community treatment for early parole. The total number of all release hearings from 1978 to 1979 has increased from 11,856 to 12,844. Finally, the number of parole violation hearings held by the Board has continued to decline from 1977 to 1979. This relates to the fact that the Division of Parole began utilizing hearing officers in 1978 to conduct final violation hearings, which are affirmed by the Board. The effect was a reduction in Board-held final violation hearings.

Table 1 displays the different types of hearings conducted by the Board of Parole.

Table 2 shows the results of the initial release hearings conducted by the Board in calendar year 1979. There were 6,628 people seen by the Board who were eligible to be released and 52% received a release decision.

Table 3 shows the number of people who applied for local release and were granted parole. Two thousand eight hundred seventy-eight people applied and only 33% were released by the Board.

Parolee Movement and Census

Table 4 offers summary statistics from the beginning of the year to the close of the year. January 1, 1979, there were 13,337 active parolees. At the end of 1979, there were 14,808 active parolees for an eleven percent increase. There were 3,219 parolees delinquent at the close of 1979 yielding a total caseload count of 18.027. Thus, 82% of the parolee caseload were active with only 18% in delinquent status.

Caseload Distribution

Parolees are assigned to a particular level of supervision upon release from prison and are subsequently assigned to lower levels of supervision based on progress towards community adjustment. The 1978 Omnibus Crime Control Program called for the enactment of yet another level of supervision entitled Special Supervision. It provides that certain individuals convicted of serious violent crimes be placed under a closer and stricter form of parole supervision. Under Special Supervision there are a greater number of office visits, home visits, employment and community visits. Parole Officers who supervise Special Supervision caseloads have fewer individuals on their caseload and can therefore give a greater amount of time and attention to the people with whom they are working.

The remaining levels of supervision are:

1. Intensive Supervision:

The parolee in this status must report weekly (or bi-weekly) to his/her parole officer. The officer makes at least one home visit a month and one employment check a month.

2. Active Supervision:

The parolee in this status must report on a monthly basis. The parole officer makes at least one home visit a month and one employment check every two months.

3. Reduced Supervision:

The parolee in this status must report every three months (or less). The parole officer makes home visits on a similar basis.

Table 5 reflects caseload distribution by Area Office and the Bureau breakdown of the New York City Office.

CRIME VICTIMIZATION

The Crime Victims Compensation Board has made available data from their Annual Report for inclusion in Crime and Justice 1979.

Claims Analysis

The Crime Victims Compensation Board is limited to servicing innocent victims of violent crime. Violent crimes or crimes against the person (murder, rape, robbery and assault) accounted for less than 14% of the total offenses reported statewide. Under 3% of all crimes or about 15% of violent crimes involve medical treatment and other financial losses to the victim potentially covered by the State crime victim compensation program. While seemingly small in percentage terms, the crime victims eligible for compensation under the state program represent the thousands of victims most critically in need of financial assistance for crime-related injuries and losses. (Most financial losses of crime victims involve property losses not covered under the present program.)

The number of claims received during the 1979-80 fiscal year rose sharply from the previous fiscal year, an increase of 25% over last year. This continues the progression of previous years.

This increase use due in part to the fact that all law enforcement agencies in New York State, where a crime may be reported, have on hand claim forms and information borchures relating to the availability of compensation from this Board to every victim of a violent crime. Inasmuch as there has been and continues to be an increase in public awareness of the Board, we anticipate similar substantial increases in the next fiscal year.

Effective April 1, 1979, the Board commenced operations of a Unit for the Elderly. The purpose of the Unit is to handle all claims filed by victims sixty and older and to follow up on these cases including contact with the victims or relatives, hospitals, doctors, employment, etc. This Unit rendered special assistance to the elderly as was required by assisting an elderly claimant in the preparation of requested documentation for processing the claim. The elderly claims that were disallowed for lack of documentation that were processed by the Unit for the Elderly is 50% less compared to those disallowed for documentation of total decisions.

CRIME AND JUSTICE IN NEW YORK STATE

1980 ANNUAL REPORT

This is the sixth annual report of crime in New York State prepared pursuant to the responsibility assigned to the Division of Criminal Justice Services (DCJS) by Chapter 654 of the laws of 1974. This report not only reflects offense and arrest data reported by law enforcement agencies, but also provides a broad overview of the roles played by the entire criminal justice community in responding to the problem of crime in New York State.

The support and cooperation of more than 600 police agencies, sheriff's offices and specialized police agencies in reporting data concerning offenses and arrests as part of the Uniform Crime Reporting Program, has proven invaluable in assisting DCJS in carrying out its responsibilities.

At the request of the Governor's Task Force on Domestic Violence, DCJS in 1980 developed the means for collecting offense data relative to the incidence of domestic violence crime in New York State. DCJS expanded the Uniform Crime Reporting System as the vehicle for collecting the domestic violence data. This report contains the first of an annual series of reports on domestic violence in the State.

The Felony Processing System has provided data concerning indictments, dispositions and sentences. These data are reported to DCJS by the District Attorneys of this State to whom we express our appreciation for their continued cooperation and assistance.

To provide a comprehensive view of the criminal justice process, data from the courts, probation, corrections, parole and the Crime Victims Compensation Board has been once again added to the report. We are indebted to the State Administrator of the Courts, the Director of Probation, the Commissioner of Correctional Services, the Chairman of the Board of Parole, and the Chairman of the Crime Victims Compensation Board. For the first time in the report, we have included data graciously provided by the State Commission of Correction and the Division for Youth. With the inclusion of data from these two agencies, the Crime and Justice Annual Report is truly representative of the entire criminal justice community.

We trust that the data contained in this report will prove useful to the criminal justice administrator, to the executive and legislative branches of government, to researchers, planners and the general public. We are confident that the contributions and counsel of those who have participated in the preparation of this report will continue to assist us in providing the people of New York State with a better insight into the problem of crime in New York State.

Frank J. Rogers
Commissioner

FOREWORD

The crime index rose 10.5% in New York State in 1980 and reached a new high since the Crime and Justice Report was first published in 1975. New York State was not unique in this respect, as crime also reached record proportions across the nation.

Although the problem of crime is too complex to be controlled by the criminal justice community alone, the challenge of a rising crime rate is not being ignored. More felony arrests are resulting in felony indictments; prosecutors are concentrating on career criminals; mandatory incarceration is prescribed for violent and persistent offenders; plea bargaining restrictions are imposed for armed felony offenders and convictions for felony indictments are increasing.

This report on crime and justice endeavors to measure the scope of crime and the response to it by criminal justice agencies. In order to assess the social and economic aspects of crime, reports submitted by police agencies, in addition to providing information on criminal offenses, include data on value of property stolen and recovered, officers killed or assaulted and agency staffing and expenditures. The response is measured to some extent by arrests, indictments, convictions, sentences and length of incarceration reported by criminal justice agencies.

However, the immense problem of crime cannot be remedied by reactive measures alone but calls for the use of all the resources of society and the concern and commitment of communities and individuals.

INTRODUCTION

The New York State Division of Criminal Justice Services was assigned the responsibility for the collection of data concerning crimes and arrests in New York State, effective January, 1975, pursuant to Chapter 654 of the laws of 1974. In assuming that responsibility, the Division also was committed to providing relevant data to the National Uniform Crime Reporting program administered by the Federal Bureau of Investigation. This document is the sixth annual report produced in the discharge of that responsibility.

Most of the data reported in this volume is based on Uniform Crime reports submitted on a monthly basis by police agencies in New York State. In 1980, all 609 police agencies participated in the Uniform Crime Reporting program and agencies with multi-county jurisdiction reported separately for each county within their jurisdictions. The cooperation exhibited by the contributing agencies in submitting these reports has been extraordinary and is the foundation that makes this report possible.

As the result of numerous inquiries from the legislature and other interested groups and as a consequence of improved reporting, we have included for the first time a breakdown of arrests by race and ethnic origin. Previously, ethnic data was not available and racial data was grossly underreported. In order to include these data in the Crime and Justice 1980, it was necessary to make estimates for the summons activity reported by New York City. In addition, the racial and ethnic data does not include arrests for "driving under the influence" reported by the New York State Police.

Detailed data on homicides and arsons are also provided by police agencies and are the subject of in-depth, special analyses by the staff of the Statistical Analysis Center.

In addition to the UCR data contained in this report, we have presented data on felony arrests, felony indictments and dispositions. The arrest material is derived from the Computerized Criminal History System (CCH), which is based on arrest fingerprint cards submitted to the Division of Criminal Justice Services in compliance with Section 160.20 of the Criminal Procedure Law. Improvements in computer programs have allowed the data base to be accessed more readily for statistical purposes. This year's report lists felony arrest data for the period of 1976 through 1980. The felony indictment and disposition material is reported by District Attorneys and Special Prosecutors throughout the State and is mandated by Section 837a of the Executive Law. While the arrest, indictment and disposition data are not transactional, they do reflect certain volumes and trends.

In order to broaden the scope of the report, we have included material provided by the New York State Division of Probation, the Office of Court Administration, the New York State Department of Correctional Services, the New York State Division of Parole, and the Crime Victims Compensation Board. The 1980 edition of Crime and Justice continues to expand its coverage and includes for the first time, data supplied by the New York State Division for Youth and the State Commission of Correction.

Offense data summarized in this report reflect only those cases known to the police by complaints from the public or their own observations. "Criminal Victimization of New York State Residents" published by the United States Department of Justice and covering 1974-1977, indicates a large number of unreported offenses for violent and non-violent offenses. The two reasons most frequently expressed for not reporting offenses were that nothing could be done or that the offense was too unimportant for police attention. From this and other studies on victimization, it is apparent that crime data based on offenses known to the police are only part of the crime problem. It is equally apparent that it is impossible for the police to respond to crimes which are not reported.

How and by whom can crimes be prevented? In 90% of the Violent offenses reported in the victimization study, attacks were directed against lone victims. Many of the Violent and Non-Violent offenses took place in residences or other indoor areas and are committed by relatives or acquaintances of the victims. Police patrols have no access to many of these areas until after an offense is committed and reported and are powerless to prevent them.

In May 1979, the Governor's Task Force on Domestic Violence was established by Executive Order to study "the traumatic effects of domestic violence and how our social and legal systems can better deal with such violence and its causes". In 1980, the Division of Criminal Justice Services collected data on selected domestic violence offenses: Aggravated Assault, Simple Assault, Reckless Endangerment, Menacing and Sex Offenses. During the first year, the program achieved only a limited degree of success, the reasons for which are two-fold. In the first instance, there were a significant number of agencies that did not understand how and under what circumstances domestic violent information is to be reported. Secondly, some larger departments lack the technical capability to capture domestic violence data in their reporting systems. DCJS is working on both fronts to improve reporting in 1981.

The Violent Felony Warrant Enforcement Program, which was instituted to insure and expedite the enforcement of warrants for eighteen serious offenses, is evaluated in an analysis prepared by the Statistical Analysis Center. Data for this analysis were derived from the DCJS Wanted Persons System.

The UCR data included in this report are divided into five main segments:

A. Reports of Part I offenses comprising the following seven crime classifications:

1. Criminal Homicide

   a. Murder and Non-Negligent Manslaughter
   *b. Negligent Manslaughter

2. Forcible Rape

3. Robbery

4. Aggravated Assault

5. Burglary

6. Larceny

7. Motor Vehicle Thefts

*All of the above, with the exception of 1(b) Negligent Manslaughter, comprise the Crime Index, which is used to measure the relative extent of crime nationwide and to show trends in crime.

We have also attempted to provide greater detail about reported index crime including:

a. Type of weapon/force used

b. Type of location in which the crime was commited

c. Number of offenses cleared

d. Type and amount of property stolen and recovered

B. Part II Offenses

8. Arson
   commercial, residential or motor vehicle
9. Kidnapping
10. Controlled Substances
    Sale/Manufacture - Opium, Cocaine, Derivatives, Marijuana, Synthetic Narcotics, Other Dangerous Drugs
11. Dangerous Weapons
    Handguns, Other Firearms, Explosives, Other Weapons
12. Bribery
13. Sex Offenses
14. Extortion
15. Forgery & Counterfeiting
16. Prostitution & Vice
    Promoting Prostitution, Prostitiution and Patronizing Prostitutes
17. Stolen Property
18. Coercion
19. Criminal Mischief
20. Fraud
21. Gambling
    Bookmaking, Numbers & Lottery, All Other Gambling
22. Offenses Against Public Order
23. Embezzlement
24. Simple Assault
25. Offenses Against Family
26. Driving Under Influence
    Alcohol, Drugs
27. Unauthorized Use of Vehicle
28. Possession of Burglar Tools
29. Liquor Law Violations
30. Disorderly Conduct
31. Public Drug Intoxication
32. Loitering
33. All Other Offenses

C. Age, Sex and Race of Persons Arrested

1. Persons Under 16 Years of Age (Juvenile)

2. Persons 16 Years of Age and Over (Adults)

The arrest reports reflect the number of persons arrested for Part I and Part II offenses, as described above.

NOTE: The FBI/UCR program treats persons under 18 as juveniles, and requires that they be so reported. This report, however, is compiled in accordance with New York State law which classifies juveniles as those persons under 16 and adults as those 16 and over.

D. Law Enforcement Officers Killed or Assaulted

Statistics are provided on the number of New York State law enforcement officers killed or assaulted and description in some detail of the conditions under which the officers were assaulted.

E. Homicide Analysis

This portion of the report provides details on homicides committed in New York State, describing the victims and circumstances under which such homicides occurred.

In order to combat crime effectively, it must be known when and where crime is occurring. The county, as a crime location index, is not sufficiently definitive. Therefore, we have instituted direct reporting to the state program from every police chief and sheriff in New York State in accordance with state law.

POPULATION DATA SOURCE

Population data used for calculating crime rates for the 1980 Annual Crime and Justice Report are preliminary 1980 census data. These were obtained from the U.S. Department of Commerce's Bureau of Census Preliminary Population and Housing Unit Counts (document No. PHC80-P-34). Final census figures were not available in time for use in this report.

It was unnecessary to use the population estimating procedure explained in previous Annual Crime and Justice Reports, because the preliminary census counts were available.

It should be noted that a major change in crime rate from a previous year could result from an increase or decrease in the number of actual offenses reported by police, a significant shift in population or a combination of both.

STATUTORY AUTHORITY

The collection, analysis and dissemination of criminal justice data in New York State is authorized by Sections 837, 837-a and 837-b of the Executive Law, to wit:

"§ 837. Functions, powers and duties of division

The division shall have the following functions, powers and duties:

... 4. In cooperation with the state administrator of the unified court system as well as any other public or private agency,

... (c) collect and analyze statistical and other information and data with respect to the number of crimes reported or known to peace officers, the number of persons arrested for the commission of offense, the offense for which the persons was arrested, the county within which the arrest was made and the accusatory instrument filed, the disposition of the accusatory instrument including, but not limited to, as the case may be, dismissal, acquittal, the offense to which the defendant pled guilty, the offense the defendant was convicted of after trial, and the sentence."

"§ 837-a. Additional functions, powers and duties of the division

In addition to the functions, powers and duties otherwise provided by this article, the division shall:

1. Collect and analyze statistical and other information and data with respect to the number of persons charged with the commission of a felony by indictment or the filing of a superior court information, the felony with which the persons was charged therein, the county within which the indictment or superior court information was filed, the disposition thereof including, but not limited to, as the case may be, dismissal, acquittal, the offense to which the defendant pleaded guilty, the offense the defendant was convicted of after trial, and the sentence."

"§ 837-b. Duties of courts and peace officers

1. It is hereby made the duty of the state administrator of the unified court system; and of every sheriff, county or city commissioner of correction and head of every police department, state, county or local, and also railroad, steamship, park, aqueduct and tunnel police and town constables, of every district attorney, of every probation agency; and of head of every institution or department, state, county, and local, dealing with criminals and of every other officer, person or agency, dealing with crimes or criminals or with delinquency or delinquents, to transmit to the commissioner not later than the fifteenth day of each calendar month, or at such times as provided in the rules and regulations adopted by the commissioner, such information as may be necessary to enable him to comply with subdivision four of section eight hundred thirty-seven. Such reports shall be made upon forms which shall be supplied by the commissioner.

2. Such officers and agencies shall install and maintain records needed for reporting data required by the commissioner and shall give him or his accredited agents access to records for the purpose of inspection.

3. For every neglect to comply with the requirements of this section, the commissioner may apply to the supreme court for an order directed to such persons responsible requiring compliance. Upon such application the court may issue such order as may be just, and a failure to comply with the order of the court shall be a contempt of court and punishable as such."

NEW YORK STATE COUNTIES AND COUNTY SEATS★

Published by

STATE OF NEW YORK

DEPARTMENT OF COMMERCE

THE

PROBLEM

THE PROBLEM

New York State reported a 10.5% increase in Index offenses from 1979 to 1980, an upward trend which parallels the increase nationwide.

Statewide, total Index offenses are at the highest level ever reported to the Uniform Crime Reporting Program as the offense categories of Murder, Forcible Rape, Robbery, Burglary and Larceny reached record highs. Motor Vehicle Theft showed a substantial increase from 1979 to 1980, while Aggravated Assault registered a slight decline.

New York City reported 59% of the State Index Total and showed a 14.3% increase from 1979 to 1980. Upstate, with the remaining 41% of the Index Total, had a 5.3% rise during the same period.

Comparisons of crime rates between police agencies or counties should be made only with extreme caution. The crime rates published in the report are based solely on offenses reported or known to the police and resident population. Additional factors which may influence crime rates are density of population, age of population, topography, geographic location, social attitudes, economic conditions, number of police officers, seasonal and transient population, and rural or urban environments.

VIOLENT OFFENSES

Violent offenses involve those Index crimes which callously disregard the personal rights of the victim. These crimes are Murder, Forcible Rape, Robbery and Aggravated Assault. During 1980, they made up 14.9% of the Index total. Statewide, Violent offenses were up 11.4%, 13.0% in New York City and 4.0% Upstate. New York City accounted for 83.1% of the Violent offenses in 1980, compared to 81.9% in 1979. Statewide, 26.1% of the Violent Offenses involved the use of a handgun. Violent offenses were cleared at a 28.7% rate.

NON-VIOLENT OFFENSES

Non-Violent offenses account for 85.1% of the Index total in 1980. The Non-Violent offenses are Burglary, Larceny and Motor Vehicle Theft. They generally do not involve a confrontation between victim and offender. For New York State, Non-Violent offenses rose 10.3% from 1979 to 1980. During the same period, New York City showed a 14.7% increase and Upstate rose 5.4%. Non-Violent offenses are distributed more evenly than Violent offenses with New York City constituting 54.7% of the State total and Upstate, 45.3%. The clearance rate for Non-Violent offenses was 12.6%.

FORCIBLE RAPE

In New York State, Forcible Rape offenses showed only a slight 0.3% increase from 1979 to 1980 with New York City dropping 4.2% and Upstate rising 11.8%. Upstate reported 31.2% of all Forcible Rape offenses in 1980, up from the 28.0% reported in 1979.

Slightly more than half of the Rape offenses in New York State involved the use of weapons and in 10.9% of the offenses, the weapon was a handgun. Statewide, the clearance rate for Forcible Rape offenses was 41.5%. Rape offenses comprised 3.0% of the Violent offense total.

ROBBERY

In New York State, Robbery offenses showed the largest increase among Index offenses, up 20.1%. In New York City, robberies were up 21.8% compared to 7.6% Upstate. Almost 90% of the robberies in New York State took place in New York City.

As in previous years, more than half of the robberies took place on the street, where strong arm tactics were employed. However, an increasing proportion of street robberies involve the use of handguns, 25% in 1980 versus 22% in 1979. After street robberies, residences were the most frequent location of robberies, accounting for 15.2% of the State total. Robberies of gas stations increased 71.4% from 1979 to 1980 and in 69.0% of these robberies, a handgun was used. Despite the overall increase in robberies, bank robberies declined 10.7% from 1979 to 1980.

Robberies made up 62.3% of the Violent Offense total and had a clearance rate of 15.9%.

AGGRAVATED ASSAULT

Of the 60,217 Aggravated Assaults, 76.0% involved the use of some sort of weapon. With a 1.6% decrease from 1979 to 1980, Aggravated Assault was the only Index offense to show a decline. Aggravated Assaults occur most frequently on the street, usually with a weapon other than a firearm or knife. For Aggravated Assaults within residences, which account for 28.7% of all Aggravated Assaults, a knife or other cutting instrument was used in 30.5% of the attacks.

Aggravated Assaults made up 33.5% of the Violent offense total and were cleared at a 50.0% rate.

BURGLARY

Burglaries in New York State in 1980 showed a 16.9% increase from 1979 and residences were the target in 70.6% of the 358,976 burglaries. For those residential burglaries where the time of entry could be determined, 66.8% occurred from 6 AM to 6 PM. No force was required to gain entry in 16.1% of the residential burglaries. Where the time of entry could be established for non-residential burglaries, 81.1% occurred from 6 PM to 6 AM and 10.0% required no force.

Burglaries constituted 35.0% of the Non-Violent offenses and had a clearance rate of 12.0%.

LARCENY

Statewide, the 532,638 larcenies represented a 7.0% increase over 1979 and made up the largest category in the Index offenses, 44.2% of the total. Larceny is the only Index offense more prevalent Upstate than in New York City. However, New York City showed a 13.0% increase from 1979 to 1980 while Upstate was up only 2.3%. Thefts from motor vehicles and theft of motor vehicle parts accounted for 37.6% of the total larcenies in New York State in 1980. Bicycle thefts showed an 8.9% decrease, while pocket-picking offenses rose 22.9%.

The clearance rate for larcenies was 14.4% and they made up 52.0% of the Non-Violent offenses.

MOTOR VEHICLE THEFT

For New York State, Motor Vehicle Theft was up 7.1% from 1979 to 1980 with a 23.5% increase in NYC and a 5.7% decrease Upstate. The vulnerability of motor vehicles parked on the street is evident from the portion (77.1%) stolen while parked on the street versus those stolen from parking lots, garages (14.2%) and other locations (8.7%).

Motor Vehicle Thefts were cleared at a 7.3% rate. Recovery of the vehicle alone, without an arrest or exceptional clearance, does not clear the offense.

PART II OFFENSES

Part II Offenses, which range in seriousness from Class A felonies to violations, totalled 1,177,489 in 1980, a drop of 3.2% from the 1,215,863 offenses reported in 1979. The decrease in Part II offenses is mostly attributable to the decrease in the largest offense category "All Other Offenses", which dropped 10.7%.

Part II Offenses were cleared at 59.0% rate. This high rate of clearance may be due to situations where the offense and arrest occur almost simultaneously as in Prostitution offenses, Drug Possession and Driving While Intoxicated.

The large increase in Loitering offenses is the result of the resumption of reporting by some railroad police agencies.

PROPERTY STOLEN

Currency and property losses as the result of the Index offenses increased from $890,371,260 in 1979 to $1,186,996,084; a gain of 33.3%.

Among the Index offenses, motor vehicle thefts have accounted for the greatest dollar loss in previous years. In 1980, losses from burglaries ($496,968,268) surpassed the value of stolen vehicles ($413,742,817).

The value of jewelry and precious metals stolen in the commission of Index offenses was up 97% from 1979, a continuation of the upward trend first reported in 1979. Household goods and firearms taken in the commission of Index offenses also showed large increases in the value of the items stolen.

PERCENTAGE OF HANDGUNS INVOLVED IN SPECIFIED OFFENSES
NEW YORK STATE
1980

HOMICIDE 1980

The Offense

After a three year decline ending in 1979, homicide offenses in New York State increased 6.2% from 2,098 in 1979 to a new high of 2,228 in 1980. Rates of increase in two of the three regions of the State were similar; New York City, the largest Metropolitan Planning Area in the State, had an increase of 4.8%, and the Other Areas had an increase of 3.1%. In contrast, the third region, the Other Metropolitan Planning Areas, showed an increase of 18.5%. /1 Despite the relatively large rate of increase in homicides in the Other Metropolitan Planning Areas, the rate for the State as a whole increased considerably less due to the influence of the New York City rate. In 1979, the most recent year for which comparable national data are available, New York State's homicide rate of 11.9 per 100,000 inhabitants was the twelfth highest in the nation. /2 (FBI, Uniform Crime Reports for the United States 1979).

The peak month for homicides was December. Homicides were lowest in the first quarter of the year and consistently rose in subsequent quarters. This quarterly trend has held each year since 1976 (Table 1).

New York City accounted for the bulk (81.7%) of homicides. Of the remaining 18.3%, 12.3% occurred in the Other Metropolitan Planning Areas and 6.0% in the Other Areas. These proportions have remained unchanged for the last five years (Table 1 and Figure 1).

In over half (58.3%) of the 955 homicides in which victim-offender relationship is known, the victim and offender knew each other. More than half in which the circumstance is known occurred in connection with an altercation. Almost half (1,091 cases) of all homicides occurred indoors. More than one out of every ten homicides (12.6%) was a group crime involving multiple offenders. The weapons most frequently used were firearms (55.7%), mainly handguns, followed by cutting or stabbing instruments (23.7%) (Table 2 and Figure 2).

As in previous years, New York City homicides tended to be more related to "street" violence than those in the rest of the State. They were more likely to be perpetrated as a group crime, were more likely to involve the use of a handgun and to take place in conjunction with a robbery. They were also most likely to occur outdoors. New York City homicides were less likely than homicides occurring elsewhere in the State to involve victims who are white or female, or who are physically vulnerable (the very young and the elderly).

Police agencies reported 2,494 homicide offenders in New York State in 1980. The majority of known offenders were black in New York City homicides and white in the rest of the State. Homicide offenders appeared to be younger in New York City than in the rest of the State. No Hispanic victims or offenders were reported in homicides outside New York City (Table 3).

/1 "New York City" is an aggregation of the five boroughs comprising the City; "Other Metropolitan Planning Areas" (MPA's) is a grouping of the six largest counties (listed in Table 1) which have generally similar population and crime patterns. "Other Areas" are the remaining counties of the State.

/2 Does not include Puerto Rico.

Firearms were used more than half the time in homicides involving multiple offenders, those not connected with altercations, and those occurring outdoors. Nearly one-half (49.1%) of homicides between strangers involved the use of a firearm. Homicides resulting from altercations were more likely to be perpetrated through use of a stabbing or blunt instrument than were other homicide circumstances.

The Victims

The 2,228 homicide victims were predominantly male (82.4%). More than one-half (55.2%) were 20 to 39 years old. Blacks constituted the largest victim group (44.4%) followed by whites (30.8%) and Hispanics (22.7%). This pattern of victim characteristics has not changed in the past five years (Table 5 and Figure 3). While the overall percentage of female victims was 17.6%, this percentage rises in the extreme age groups: 40.6% among the very young (under 10) and 39.2% among the elderly (60 and over). Elderly victims were more likely than younger victims to be white (Tables 6,7).

As expected, the killing of the very young victims suggests situations indicative of family abuse, while the killing of the elderly is indicative of more "predatory" offender behavior. The very young were more frequently killed by a single offender, a non-stranger, with the use of "personal" weapons (i.e. hands, fists, etc.), indoors, and under circumstances not related to an altercation or the commission of another felony. The elderly were more likely than younger age groups to be murdered by a single offender, by a stranger, and in connection with the commission of another felony. The likelihood of a homicide victim being killed by multiple offenders or by a stranger tends to increase with victim age (Table 8).

Male victims were more likely than female victims to be killed by a group of offenders, by a stranger, with the use of a firearm, and outdoors. On the other hand, female victims were more likely to be killed by a single offender, by a family member, and indoors. Their homicides were more likely to result from stabbing, bludgeoning, or strong-arm methods (Table 9).

Hispanic victims had the highest likelihood of being killed by a handgun (63.4%), followed by the "Other" victim race groups, blacks, and whites. As a group, blacks were the most likely to be killed during an altercation (63.7%); whites were the least likely (39.2%). The "Other" victim race group had the highest percentage of persons killed by strangers (51.7%); while the black victim category had the lowest (35.0%)(Table 10).

The Offenders

As with victims, homicide offenders were predominantly male (91.6%). Over half (52.5%) of offenders whose race was known were black. Offenders appeared to be, on the average, younger than victims. This pattern of offender characteristics has been consistent for the last five years. The mean ages of offenders and victims were 27.5 and 33.6 years, respectively.

The propensity to commit group homicides was strongest among offenders in their late teens (49.3%) and weakened sharply with the advance in offender age. To a lesser degree, but indicating the same relationship, the use of a handgun, the occurrence of criminal motivation (i.e. felony-connected homicides), and the victimization of a stranger tended to decline with an increase in the offender age. On the other hand, the occurrence of non-criminal motivation (altercation), the victimization of persons known to the offender, the use of personal weapons, and the location of the homicide in an indoor setting were characteristics that appear associated with older offenders (Table 14).

Except for Hispanics, the race distribution of male offenders was similar to that of female offenders (Table 15). Hispanic offenders account for 25.6% of the male offender population, but only 10.9% of the female offender population.

Female offenders were less likely to engage in group homicide, use handguns, or be criminally motivated than were male offenders. They were more likely to commit homicide indoors, to kill family members and to commit homicide during an altercation or romantic dispute (Table 16).

Black and Hispanic offenders were more likely than other offender race groups to commit homicide as a group crime and in conjunction with a robbery (Table 17).

Homicide offenders clearly tended to victimize members of their own race. The percentage of persons who killed persons of the same race was highest among white offenders (86.8%). It was 76.3%, 72.1%, and 78.3% among black, Hispanic and "Other" races, respectively (Table 18).

The data indicate that female homicide offenders were as likely to have male victims as were male offenders. Both groups seemed to victimize males over females at a ratio of 9 to 1.

The data do not indicate a strong tendency of offenders to victimize persons of their own age group. Offenders 15 years of age and younger more frequently victimized the elderly than did any other offender age group under 60 (Table 19).

ARSON INCIDENT STATISTICS
NEW YORK STATE 1980

This analysis of arsons in New York State is the second such study on this offense by the Statistical Analysis Center (SAC). The data for these studies, first produced in 1979, are derived from an aggregate arson data collection program using Supplementary Arson Reports submitted through the Uniform Crime Reporting (UCR) System.

Arsons reported under Part II of the UCR program and shown elsewhere in this volume are reported under the "hierarchy rule", by which the offense is counted only if it is the most serious in an incident. In contrast, an arson offense is reported on the Supplementary Arson Reports regardless of whether or not it occurred in conjunction with a more serious offense. This analysis, therefore, shows more arson offenses than are shown for Arson in the UCR Part II offenses presentations.

The arson reporting system was initiated in April 1979 with jurisdictions asked to report retroactively to January 1979.

The present analysis contains the first full year of data reported through the Supplementary Arson Reporting System. While reporting appears considerably improved over 1979, there are indications that 1980 data from some jurisdictions may be incomplete as agencies continued to gain experience with this new data system.

Comparisons between the 1979 and 1980 data should be interpreted with caution. With further improvements in reporting, such comparisons will be able to be made with greater confidence in future years.

Estimated values of property damage were not uniformly reported during the year and were, therefore, not included in the analysis.

In the tables that follow, reported and cleared arson incidents are categorized according to region, type of property and month of occurrence. "Arson Incidents Reported" are only those incidents which are found to constitute arson after investigation by police, fire or other agencies. A "Cleared" arson incident is defined as an offense for which a perpetrator has been taken into custody or is otherwise known by police to have committed the crime.

In this analysis, data are presented for New York State as a whole and are then divided according to the region in which the incident occurred. The three regions into which the data are divided are: New York City (the largest Metropolitan Planning Area in the State), Other Metropolitan Planning Areas and Other Areas. Other Metropolitan Planning Areas are major population areas of the state in which a relatively high proportion of the State's criminal activity takes place, and include Erie, Monroe, Nassau, Onondaga, Suffolk and Westchester Counties. Other Areas of the State are the upstate suburban and rural areas, including some smaller cities such as Albany, Binghamton and Utica.

Type of property is divided into three categories: Structural (including residential, commercial and other), Mobile, and Other Property. These are more fully defined in the footnotes following the data tables.

Arsons Reported

There were 14,429 arson incidents reported in New York State in 1980 (arson incidents reported are shown in Table 1). Just over 60% of these (8,697 cases) occurred in New York City, approximately one-quarter (3,671) occurred in the Other Metropolitan Planning Areas, and fewer than 15% (2,061) occurred in the Other Areas of the State.

In New York State, arsons of structures accounted for an overwhelming proportion (87.0%) of arson incidents. Structure arsons account for 96.4% of all arsons in New York City, and 72.7% of all arsons in the other two regions of the State (68.2% in the Other MPAs and 80.7% in the Other Areas).

Among structure arsons, residential structure arsons are by far the most common in all three regions as well as in the State as a whole. Examination of these residential structure arsons shows that in New York City the vast majority (66.7% of the total) are "Other Residential" arsons (of structures such as apartments, tenements and hotels). Almost 87% of all "Other Residential" arsons take place in New York City. On the other hand, over 70% of the "Single Occupancy" residential structure arsons take place outside New York City, and constitute 27.6% of the total arsons in the Other MPAs and 22.8% of the total in the Other Areas.

In New York State as a whole, commercial structure arsons account for 18.7% of all arsons. A comparison by region shows that Other Areas have a higher proportion (29.7%) of commercial structure arsons than either of the two remaining regions. The Other Areas also show the highest volume of commercial storage structure arsons (14.3%). "Other Commercial" structure arsons are the most frequent form of commercial arson in New York State (12.5% of total); there is no substantial difference in the proportion of each region's total in this category.

Arsons of "Community/Public" structures and "Other Structures" account for a low proportion of the total arsons.

There are substantially more motor vehicle arsons reported in the Other Metropolitan Planning Areas (62.7% of all motor vehicle arsons in New York State) than in either of the remaining regions. The "Other Mobile" category follows a similar trend.

As was the case in 1979, the number of arsons reported by month remains relatively stable. The peak month for arsons Statewide was June, when 1,402 incidents (9.7%) were reported. June was also the peak month for New York City, where 868 arson incidents (10.0%) were reported. The peak month for arsons in the Other Metropolitan Planning Areas was July (397 incidents, 10.8% of the total) and in the Other Areas it was May (219 incidents, 10.6% of the total).

Abandoned Structures

Table 2 highlights arsons of abandoned structures. These arsons of abandoned structures account for 31.2% of all arsons in New York State. The proportion for New York City is 39.9%. For the Other Metropolitan Planning Areas, the proportion is 20.2%, and for the Other Areas it is 14.1%.

Statewide, residential structures are the most common form of abandoned structures to be targets of arson, with the likelihood greater in New York City than in the other two regions of the State. While almost all arsons of "Other Residential" abandoned structures occur in New York City (95.4%), only 35.7% of arsons of single occupancy abandoned structures occur there.

Almost half (49.3%) of the Single Occupancy abandoned structure arsons occurred in the Other MPAs, accounting for 60.3% of all abandoned structure arsons in the Other MPAs. Single Occupancy abandoned structures were the most common target for abandoned structure arsons in the Other Areas as well, accounting for 46.7%, followed by abandoned commercial storage structures (21.0%).

Arson Incidents Cleared

In 1980, 1,419 arson incidents were cleared (see Table 3). This represents an overall clearance rate of 9.8% (see Table 4), a slight increase over that shown for 1979. This low clearance rate seems to reflect the extreme difficulty involved in investigating a crime in which most of the physical evidence is destroyed. (The clearance rate is the ratio of clearances to the total number of arsons reported, expressed as a percent. Because a 1980 clearance does not necessarily reflect clearance of an offense reported in 1980, the clearance rate should be considered only as a general indicator of processing efficiency.)

Of the 1,419 arson incidents which were cleared Statewide in 1980, 1,165 (82.1%) were structure arsons. In all three regions of the State, the highest percent of arson incidents cleared was in the Residential category; in New York City, the Residential category accounted for 74.4% of the total arsons cleared, in the Other MPAs this percentage was 46.1%, and in the Other Areas it was 46.2%. The category accounting for the highest proportion of clearances in New York City is the Other Residential category (69.7%), which includes apartments, tenements, hotels, etc. In the other two regions of the State, however, the modal category for clearances is Single Occupancy residential.

There is considerable variation in the arson clearance rates among the Type of Property categories Statewide; the rates vary from about 5% for Other Residential structures to about 59% for Other Property. However, this fluctuation is not reflected in the regional breakdowns. Within each region, the clearance rates remain relatively stable. The fluctuation in the Statewide clearance rates may be attributed to the variance in the volume of incidents reported among the three regions.

Clearance rates for New York City remain consistent regardless of Type of Property, averaging a rate of 2.4 incidents cleared for every 100 reported.

The other two regions of the State cleared arson incidents at a much higher rate; in the Other Metropolitan Planning Areas the rate is 18.1%, and in the Other Areas it is 26.4%. These rates remain generally consistent among the Type of Property categories for both regions, except that the Community/Public structure clearance rate in the Other Areas was higher (49.6%) and the Mobile rate in the Other MPAs was lower (8.0%) than the average rates for the regions.

Statewide and within each region, clearance rates remain relatively stable throughout the year. They range Statewide from a low of 8.6% in September to a high of 11.8% in January. There is more variation proportionately within the regions; the Other MPAs show a low of 13.3% in November and a high of 26.3% in January and in the Other Areas, the low as 18.8% in September and the high was 31.1% in May.

Table 5 presents data on arson clearances involving persons under 18 years old. A comparison with the overall clearance data in Table 3 shows that 31.4% of all clearances in New York State involved persons in this age group. (This proportion is exactly the same as it was in 1979.) The proportion of clearances in this age group varies considerably among the three regions. Only 3.8% of the clearances reported by New York City involved persons under 18 years old. The Other MPAs and the Other Areas reported 34.8% and 38.1% respectively.

The arson clearances involving persons under 18 years old follow a pattern very similar to that shown by the total arson incidents cleared (see Table 3).

In summary, over 14,400 arson incidents were reported in New York State in 1980. Just over 60% of these occurred in New York City, a drop of 9.0% from last year. The vast majority of the 1980 arsons were structure arsons (87.0%); 60.9% were residential structure arsons, and 31.2% were arsons of abandoned structures. Clearance rates for arson incidents in New York State were relatively low (9.8%), and in the regions ranged from 2.4% in New York City to 26.4% in the Other Areas.

LIST OF FOOTNOTES
For Arson Tables 1 - 5

(a)Includes Erie, Monroe, Nassau, Onondaga, Suffolk and Westchester counties.

(b)Includes apartments, tenements, flats, hotels, motels, inns, dormitories and boarding houses.

(c)Includes warehouses, garages and barns.

(d)Includes stores, restaurants and offices.

(e)Includes churches, jails, schools, colleges and hospitals.

(f)Includes out-buildings, monuments and structures under construction.

(g)Includes churches, jails, schools, colleges, hospitals, out-buildings, monuments and structures under construction.

(h)Includes motor vehicles, airplanes, boats, trailers and recreational vehicles.

(i)Includes airplanes, boats, trailers and recreational vehicles.

(j)Includes crops, timber, fences and signs.

In Tables 1 through 5, percentages do not always total 100.0 due to rounding.

Domestic Violence in New York State

The Governor's Task Force on Domestic Violence was established by Executive Order #90 on May 17, 1979 to study "the traumatic effects of domestic violence and how our social and legal systems can better deal with such violence and its causes."

In mid-1979, a DCJS representative was asked to participate on the Advisory Board to the Governor's Task Force. A major concern of the Task Force was the complete lack of any pertinent data relevant to the incidence of domestic violence crime in New York State. DCJS was given the task of developing a means of collecting statistical data on domestic violence offenses throughout the state.

DCJS chose to utilize the existing Uniform Crime Reporting System as the vehicle for obtaining offense data on domestic violence. In the fall of 1979, the UCR system was modified to provide for the collection of aggregate Domestic Violence Victim Data for the offenses of Aggravated Assault, Simple Assault, Reckless Endangerment, Menacing and Sex Offenses. The Victim/Offender relationships were categorized as follows: Wife by Husband, Husband by Wife, Child by Parent, Parent by Child, and "Common Law" relationships of Wife by Husband and Husband by Wife.

The accompanying table depicts those Domestic Violence Victim data reported to DCJS during 1980. These data have been summarized for the areas of New York City, Suburban New York City Counties (Nassau, Suffolk, Westchester and Rockland Counties), Upstate Counties and the entire state as a whole.

An analysis of the data collection efforts during 1980 shows that DCJS received offense data from approximately 60% of the law enforcement agencies in the state. It should be noted that of the 40% for which no reports were received, many represent very small agencies which, in all likelihood, would have very little, if anything to report.

The analysis has also shown that there are some agencies that appear to have reported a small number of domestic violence cases, in relationship to the population being served by the police departments. The DCJS Field Services Unit will follow up on these and the non-reporting agencies.

DCJS will continue to monitor the data collection effort during 1981 and will follow-up on any continuing problems on an agency by agency basis.

THE

RESPONSE

ARRESTS

A total of 823,983 adult and juvenile arrests were reported in New York State in 1980, an 8.3% decrease from 1979. In 1980, Part I arrests -- Murder, Manslaughter, Forcible Rape, Robbery, Aggravated Assault, Burglary, Larceny and Motor Vehicle Theft -- totalled 179,343, 21.8% of all arrests and a drop of 3.5% from 1979.

Arrests for Violent offenses -- Murder, Non-Negligent Manslaughter, Forcible Rape, Robbery and Aggravated Assault -- dropped from 52,741 in 1979 to 50,777 in 1980, a decrease of 3.7%. Among arrests for Violent offenses, only those for Murder (+8.9%) and Robbery (+3.0%) increased from 1979 to 1980. Arrests for Non-Violent offenses -- Burglary, Larceny and Motor Vehicle Theft -- decreased from 132,960 in 1979 to 128,466 in 1980, a drop of 3.4%. Arrests for each Non-Violent offense category showed a drop from 1979 to 1980: Burglary, -5.6%; Larceny, -1.1%; and Motor Vehicle Theft, -9.3%.

Part II arrests were down from 712,379 in 1979 to 644,640 in 1980, a decrease of 9.5%. Contrasting with the overall decline in Part II arrests were increases in arrests for Stolen Property, Driving While Intoxicated, Liquor Law offenses and Other Fingerprintable offenses. A large part of the decrease in arrests for Part II offenses is a reflection of the 18.5% drop in arrests for "All Other Offenses". This decrease may be due to the decline in police manpower in New York City and the emphasis on arrests for more serious offenses.

Adult Arrests

The 737,950 adult arrests reported in 1980 accounted for 89.6% of the total arrests and showed an 8.9% decrease from the 809,779 adult arrests in 1979. Males predominated among adult arrests, constituting 86.9% of the total. Female arrests surpassed male arrests only for Prostitution offenses. Larceny, Fraud, Forgery and Counterfeiting were the only offenses for which female arrests exceed 25% of the total.

Adult arrests were concentrated in the lower age brackets with 55.4% of the total adult arrests in the sixteen to twenty-four age bracket and 21.3% in the sixteen through eighteen age groups. In certain offense categories, arrests for adults sixteen through eighteen showed a disproportionately high percentage of the total adult arrests: Burglary, 38.0%; Robbery, 36.9%; Motor Vehicle Theft, 34.7%; Criminal Mischief, 33.4%; and Unauthorized Use of a Vehicle, 40.7%.

Excluding the miscellaneous category of offenses, persons sixty and over were most frequently arrested for Driving Under the Influence of Alcohol or Drugs.

Felony Arrests

Felony arrest data are presented for 1976 through 1980 for New York State, the principal geographic areas, and for each county.

Statewide, felony arrests totalled 131,650 in 1980, a drop of 0.8% from the 132,679 felony arrests in 1979. Felony drug arrests showed a 2.2% increase from 1979 to 1980, while non-drug felony arrests dropped 1.0%. Compared to 1976, felony drug arrests were down 30.7% and felony non-drug arrests were up 4.9%. In 1980, felony drug arrests made up 9.4% of felony arrests compared to 13.6% in 1976.

In New York City, non-drug felony arrests dropped 3.6% from 1979 to 1980, with felony drug arrests down a slight 0.4%. In 1980, felony drug arrests accounted for 10.8% of the felony arrests versus 12.5% in 1976.

The Suburban Area of New York City showed increases in both felony drug arrests and felony non-drug arrests from 1979 to 1980, with total felony arrests up 11.1%. In 1980, felony drug arrests constituted 8.1% of the total arrests compared to 15.1% in 1976.

The Upstate area also showed increases in both drug and non-drug felony arrests from 1979 to 1980. Felony drug arrests represented only 6.0% of the felony arrest total in 1980 compared to the 16.8% they made up in 1976.

Juvenile Arrests

Arrests for persons under sixteen totalled 86,033 in 1980, a drop of 2.6% from 1979. Nearly two-thirds of the juvenile arrests were in the fourteen and fifteen age group, with the fifteen year age group accounting for 39.2% of the juvenile total. Juvenile arrests made up 10.4% of the arrest total in 1980, slightly more than the 9.8% they constituted in 1979. In some offense categories, juvenile arrests made up a significant portion of the total arrests: Robbery, 20.3%; Burglary, 25.8%; Larceny, 20.6%; and Criminal Mischief, 34.3%.

Males accounted for 84.5% of the juvenile arrests and predominated in every offense category except prostitution.

Please note that the age categories for juvenile arrests were revised for 1980 data. The age category of "10 and Under" was changed to "Under 10". Arrests of 10 year olds have been reported in the new age grouping of "10 thru 12", which was formerly "11 and 12".

New York City

Total arrests in New York City dropped 15.3% from 1979 to 1980 and decreases were also reflected in arrests for Violent offenses, Part I and Part II offenses.

In 1980, New York City arrests accounted for 58.3% of the State total versus 63.2% in 1979.

Excluding the miscellaneous category "All Other Offenses", arrests were most frequently made for Larceny (27,195), Controlled Substance (24,924), Disorderly Conduct (20,390), and Robbery (19,728).

Upstate

Total arrests increased 3.8% Upstate with arrests for Violent offenses up 7.2% and Part II offenses up 5.1%. The fifty-seven Upstate counties constituted 41.7% of the State total in 1980. However, Upstate arrests for Larceny, Sex Offenses, Simple Assault, Unauthorized Use of a Vehicle, Disorderly Conduct and Offenses Against Family constituted more than 60% of the State total.

Drug Arrests

The 43,461 drug arrests in 1980 increased less than 1% from 1979 but reflected significant changes in the pattern of arrests. For example, arrests for sales increased 14.6%, while arrests for use and possession declined 3.5%.

Within the sale category, arrests were up 12.5% for opium and cocaine, 23.0% for marijuana, 7.6% for synthetic narcotics and down 9.5% for other dangerous drugs.

In the use and possession category, arrests for opium and cocaine rose 14.0% and arrests for synthetic narcotics were up 50.3%. Marijuana arrests were down 5.0% and other dangerous drug arrests dropped 36.2%.

Driving Under the Influence

Arrests for Driving Under the Influence were up from 48,693 in 1979 to 53,260 in 1980 -- an increase of 9.4%. In 1980, DWI arrests accounted for 6.5% of the total arrests in New York State and were exceeded in volume only by arrests for Larceny, Disorderly Conduct and All Other Offenses. The fifty-seven counties outside New York City were responsible for 95.5% of the arrests for Driving Under the Influence.

Race and Ethnic Origin Data

Race and ethnic origin data are not available for the entire arrest population due to incomplete reporting. In addition, race and ethnic origin data had to be estimated for over 280,000 summonses reported by New York City, since existing forms do not permit the reporting of such data. With the inclusion of the estimated data, arrests by race are 98% complete and the data for ethnic origin 93% complete.

Racial distribution for all arrests shows that white defendants constituted 59.1% and black defendants 40.2% of the total population.

For the ethnic origin arrest data, the non-Hispanic category made up 83.8% of the total and the Hispanic category 16.2%.

INDICTMENTS AND DISPOSITIONS

The following tables present statistical data on felony indictments and dispositions for 1979 and 1980. The information is obtained from a statistical reporting system based on individual reports of each indictment and each disposition submitted by District Attorneys and Special Prosecutors throughout the state. The unit of count in this reporting system is the defendant/indictment. This includes all defendants indicted and all indictments processed as follows:

1. When several defendants are named in one proceeding or indictment, each defendant is counted separately.

2. When one defendant is named in multiple proceedings or indictments, each indictment is counted separately.

The tables include data on New York State, New York City, the Suburban Area of New York City (Nassau, Rockland, Suffolk and Westchester counties), Upstate, and the four Judicial Departments in New York State.

Tables of data are presented for three categories:

1. All Felony Charges

2. All Felony Drug Charges

3. Class A Drug Charges

The use of offender based statistics and the tracking of each defendant from time of indictment until final disposition makes possible the measuring of elapsed time between various stages in processing. The median is obtained by ranking all the values in a specific category (for example, time from indictment to disposition) and choosing the middle number -- that is, the number with an equal amount of values above and below it. As a result, median values are not influenced by very large or very small numbers which can affect averages.

It should be noted that the disposition data reported in these tables pertains to cases handled during the specified year by the Superior Courts. These dispositions may be for indictments in the same or previous years.

Defendant-Indictments

The 36,112 indictments reported in New York State in 1980 reflected a 13.5% increase over the 31,823 indictments reported in 1979. The 1980 total was the highest number of indictments since the 36,531 reported in 1975. From 1979 to 1980, New York City showed an increase of 20.6% in indictments, while the Suburban Area of New York City was up 19.8% and the Upstate area remained virtually unchanged.

In 1980, indictments from New York City comprised 55% of the State total, compared to 52% in 1979. Both the Suburban Area of New York City and Upstate showed slight decreases in their share of the State total.

Indictments for drug felonies rose 14.3% in New York State from 1979 to 1980 and each of the geographic areas reflected an increase. Statewide, drug indictments made up 11.2% of the total indictments.

Class A drug indictments decreased 59.4% in New York State from 1979 to 1980. This dramatic drop in Class A drug indictments can be attributed to a revision in the Penal Law, effective September 1, 1979, which eliminated Class A-III drug felonies and designated as Class B, the offenses previously denoted A-III.

Dispositions

Statewide, a total of 30,269 dispositions were reported in 1980, less than 1% below the 30,643 dispositions reported in 1979. New York City showed a 4.4% increase in dispositions from 1979 to 1980, while the Suburban Area of New York City dropped 5.7% and Upstate was down 5.8%.

For New York State in 1980, the 24,823 convictions comprised 82.0% of all dispositions, up from the 81.0% conviction rate in 1979. In New York City, the conviction rate increased from 77.4% in 1979 to 79.4% in 1980. A smaller increase was reflected in the conviction rate for the Upstate area, while the Suburban New York City area showed a slight decrease.

Trials accounted for 10.9% of the total dispositions in New York State in 1980, down slightly from the 11.3% they comprised in 1979. Trials made up 13.3% of the dispositions in New York City, 9.4% in the Suburban Area of New York City, and 7.7% Upstate.

Statewide, 70.5% of the trials resulted in a verdict of guilty. Guilty verdicts were returned in 69.0% of the trials in New York City, 76.5% of the trials in the Suburban Area of New York City, and 71.5% of the Upstate trials.

In 1980, guilty pleas accounted for 90.6% of all convictions in New York State, with jury trials accounting for an additional 8.4% and non-jury trials making up the remaining 1.0%.

Youthful offender adjudications made up 20.8% of the convictions Upstate, 16.6% in the Suburban Area of New York City, and 10.9% in New York City. In the Upstate area and New York City, the percentage of Youthful Offender adjudications remained relatively unchanged, but in the Suburban Area of New York City, Youthful Offender adjudications declined from 20.2% in 1979 to 16.6% in 1980.

Statewide, prison sentences comprised 39.2% of all convictions in 1980 versus 37.9% in 1979. Sentences to local institutions increased their portion of the conviction total from 24.3% to 25.2% at the same time that sentences of probation declined from 31.1% to 30.5%. Combined sentences of imprisonment and probation are recorded as sentences to local institutions on these tables.

Drug Dispositions

Statewide, dispositions of drug charges increased from 3,361 in 1979 to 3,430 in 1980, a gain of 2.1%. The conviction rate for drug charges was 81.0% in 1980, up from the 78.6% rate in 1979. Trials for drug offenses decreased from 306 in 1979 to 254 in 1980, a drop of 17.0%. Class A drug dispositions decreased from 2,164 in 1979 to 1,629 in 1980, down 24.7% as a result of legislation eliminating Class A-III offenses.

Processing Time

The median time for processing indictments through disposition was 110 days in New York State in 1980, down significantly from the 121 days required in 1979. Each geographical area showed a decrease in the median time required to process cases from indictment to disposition.

Statewide, median time to process drug charges showed a sharp decrease, dropping from 186 days in 1979 to 159 days in 1980. New York City decreased from 228 days in 1979 to 196 days in 1980, while the Suburban Area of New York City was down from 125 days to 117 days and Upstate dropped from 159 days to 132 days.

DCJS -- DIVISION OF CRIMINAL JUSTICE SERVICES

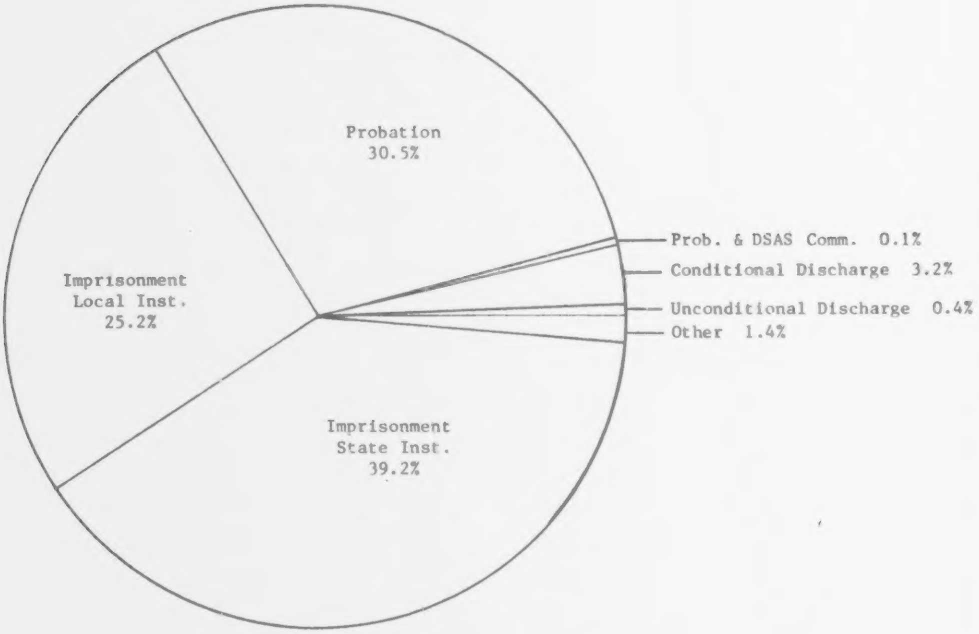
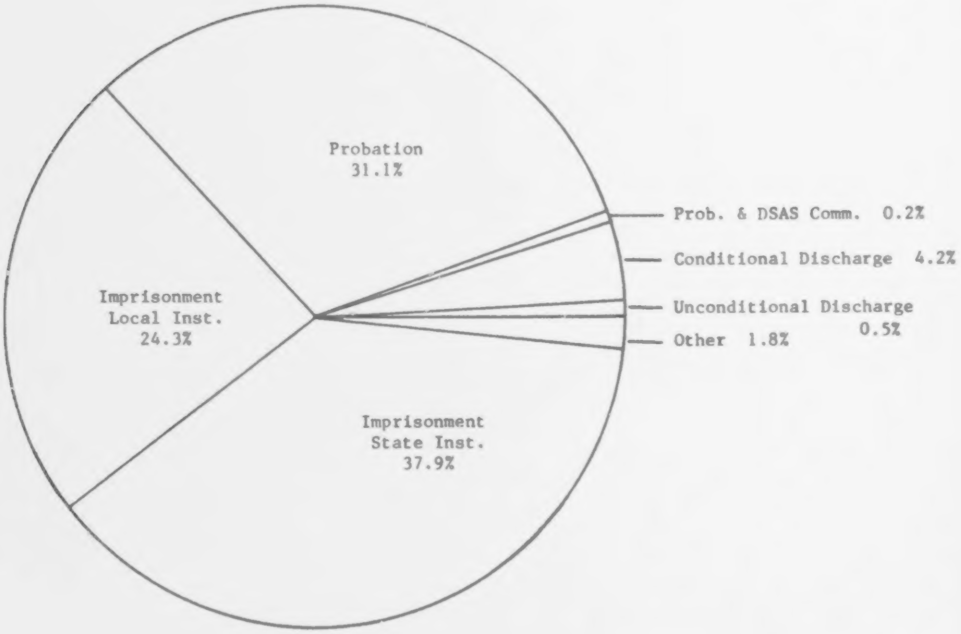
SENTENCES FOR CONVICTIONS OF FELONY DEFENDANT-INDICTMENTS
NEW YORK STATE
1980 - 1979

1980



1979



SENTENCES

Sentences for convictions of Murder, Rape, Robbery, Aggravated Assault, Burglary and Larceny and attempts at these crimes are compared for 1979 and 1980. These comparisons include type of sentence, length of maximum sentence to state prison and maximum length of probation supervision. These sentences contain Youthful Offender adjudications and sentences for second and persistent offenders which may lessen or increase the length of sentence. As an example of the effect of the persistent offender sentencing provisions, forty-one life sentences are listed for convictions of offenses other than Class A.

For convictions on these serious offenses, more than 48% of the sentences were to state prisons in 1980, a slight increase from 1979. In both years probation sentences made up about one-third of the sentences.

In 1980, 95% of the convictions for Rape, first degree, received sentences to state prison, with nearly 70% of those receiving maximum sentences of ten years or more. For convictions of Robbery, first degree, 88% of the sentences were to state prisons with 40% of the maximum sentences being ten years or more.

For all the selected convictions in 1980, 42.5% received maximum sentences of four years or less, a small decrease from 1979.

Among these selected offenses, Robbery convictions accounted for 50.7% of the sentences to state prison and 27.1% of the sentences to local jail.

Class D and E felonies made up 90.0% of the sentences of probation in 1980.

COMPARISON OF ACTIVITY AT VARIOUS CRIMINAL JUSTICE TRANSACTION POINTS

In this comparison we have examined the offenses of Homicide, Robbery and Drugs as the cases are reported at various points in the criminal justice system. Data shown for these offenses are obtained from several sources. Offenses and arrests statistics are compiled from monthly Uniform Crime Reports submitted to the Division of Criminal Justice Services by police agencies in New York State. The felony drug arrest data are obtained from fingerprint cards submitted to the Division in accordance with Section 160.20 of the Criminal Procedure Law. Data on indictment through sentence are provided on individual reports by District Attorneys and Special Prosecutors in New York State and the unit of count is defendant-indictments.

Data on indictment through sentence are not necessarily for arrests and offenses within the same year. Disposition data will also reflect indictment data from previous years.

Homicide

Homicide offenses, arrests and indictments showed a rise in 1980 compared with 1979. In both 1980 and 1979, Homicide indictments surpassed Homicide arrests. This may be accounted for by several indictments being lodged against one defendant.

In 1980, 80.2% of the convictions based on Homicide indictments received prison sentences, compared to 79.1% in 1979. For those cases where the conviction charge was Homicide, 85.8% were sentenced to state prison in 1980 versus 83.1% in 1979.

Robbery

Compared with 1979, the Robbery category reflected increases at all points in 1980, from offense through sentence. Indictments registered a 17.2% increase in response to a 20.1% rise in offenses. Over 80.0% of Robbery dispositions resulted in conviction with 59.8% of the convictions receiving sentences to state institutions.

Drug Felonies

Felony drug offenses are shown for the five year period from 1976-1980. While arrests have declined 30.7% during this time period, the conviction rate (convictions versus dispositions) has risen from 72.0% in 1976 to 81.0% in 1980.

STATISTICAL ANALYSIS CENTER

NEW YORK STATE OFFENDER BASED TRANSACTION STATISTICS (OBTS)
CASES DISPOSED IN 1978

This analysis summarizes the processing of adult offenders in New York State who were arrested for felonies and disposed during 1978. Data displayed in these presentations were obtained from the Statistical Analysis Center report entitled "Felony Offenders Disposed in 1978, An OBTS Report." This report published March 1, 1981, is the first in a new series developed by DCJS and uses data from the New York State Division of Criminal Justice Services' Computerized Criminal History/Offender Based Transaction Statistics (CCH/OBTS) database.

Displayed here are data for New York State as a whole as well as for three regions which, when aggregated, constitute the New York State total. The three regions are New York City (the largest Metropolitan Planning Area in the State), the Other Metropolitan Planning Areas, (comprising Erie, Monroe, Nassau, Onondaga, Suffolk and Westchester Counties), and Other Areas (comprising all remaining counties).

The population analyzed is a 1978 disposition cohort; that is, it includes all adult felony arrest events which were disposed during 1978. The analysis counts the arrest event (which includes all charges placed against the offender for a given arrest but analyzes only the most serious). The number of arrest events closely approximates the number of offenders arrested; however, a single individual may be counted more than once if more than one case in which (s)he was involved was disposed during 1978. Cases which were disposed in 1978 for which no final disposition was received were not included in the cohort. The number "arrested" shown in the presentations includes all those adult felony arrest events disposed during 1978 for which final dispositions were received. (For further information on the definition of the cohort and on the definition of terms used in this analysis, see "Felony Offenders Disposed in 1978, An OBTS Report" prepared by DCJS's Statistical Analysis Center).

There were 86,655 felony arrest events disposed in New York State in 1978. Of these:

- Over 97% of the 86,655 cases were prosecuted.
- Almost 35% of the study population were dismissed.
- Over 60% of the adult felony offenders disposed in New York State in 1978 were convicted.
- Of this group of convicted offenders:
    - Almost 30% were sentenced to jail.
    - Over 20% received a sentence of conditional discharge.
    - An additional 36% were given sentences of probation or fine.
    - Almost 11% were sentenced to prison.

Lower Courts

- Almost 79% of those arrested were processed in "lower" courts (i.e., New York City criminal court, City Courts, Town and Village Courts and District Courts).
- Among these lower court cases, 42% were dismissed and 58% were convicted. Acquittals were extremely rare.
- Of those convicted by lower courts:
    - More than one-third received sentences to jail.
    - More than one-fourth received sentences to conditional discharge.

Upper Courts

- More than 18% of those arrested were processed in "upper" courts (i.e., New York City Supreme Court and any County Courts).
- Among these cases only 10% resulted in dismissal and almost 84% in convictions. Less than 4% were acquitted.
- Of those convicted by upper courts:
    - Almost 60% received sentences to incarceration (state prison 42%, local jail 17%).
    - Almost 29% received probation.

Note: New York City arrests comprise the vast majority (81.7%) of the total New York State arrests in the OBTS database. Because of this, the New York State data tend to reflect patterns found in New York City data.

There were 70,784 felony arrest events disposed in New York City in 1978. Of these:

- Ninety-seven percent (97%) of the 70,784 cases were prosecuted.
- The majority of those not prosecuted were prosecution declined actions by the district attorneys.
- Almost 35% of the New York City cases were dismissed.
- 60.6% of these adult felony offenders were convicted.
- Of these convicted offenders:
    - Over 30% were sentenced to jail.
    - Almost 22% were given a conditional discharge.
    - One-third received sentences of fine or probation.
    - Almost 12% of offenders were sentenced to prison.

Lower Courts

- In New York City just over 79% of those arrested were processed in the lower courts (i.e., criminal courts).
- Of those arrested and disposed in the criminal courts, 41% were dismissed and 58% were convicted. Less than one-half of 1% were acquitted.
- Among those convicted by the criminal court:
    - Over 35% were incarcerated (i.e., jailed).
    - More than 27% were sentenced to conditional discharge.

Upper Courts

- Almost 18% of those arrested in the City were disposed in the upper courts (i.e., Supreme Court).
- Eleven percent (11%) of those disposed were dismissed and 82% were convicted.
- Of those convicted in the New York City Supreme Court:
    - More than 64% were incarcerated (48% state prison, 16% local jail).
    - More than one-fourth received probation.

0.2%	65	Other	173	1.7%

There were 10,070 felony arrest events disposed in the Other Metropolitan Planning Areas (Other MPAs) in 1978. Of these:

- More than 97% of the cases were prosecuted, a percentage slightly higher than for New York City but lower than for the Other Areas.
- The majority of those cases which were not prosecuted were not indicted by the Grand Jury (i.e., No True Bill).
- Almost 40% of these cases were dismissed, a higher proportion than for New York City or the Other Areas.
- Almost 57% of the adult felony offenders disposed in 1978 were convicted, a lower proportion than for the other two regions of the State.
- Of those convicted:
  - The largest portion (32%) were sentenced to probation, a percentage considerably higher than that of either New York City or the Other Areas.
  - Approximately one-quarter received jail sentences.
  - Almost 9% were sentenced to prison.

Lower Courts

- Seventy-six percent (76%) of those arrested in the Other MPAs were disposed in the lower courts.
- Over one-half of those arrested and disposed in the lower courts were convicted. Most of the remaining one-half were dismissed with a very few cases resulting in an acquittal or "other" disposition.
- Among those convicted in the lower courts in the Other MPAs:
  - Just over 25% received sentences to jail.
  - 29% received sentences to probation.
  - Fines were more common than conditional discharges.

Upper Courts

- Twenty-one percent (21%) of offenders arrested were disposed in the upper courts in the Other MPAs.
- Eighty-nine percent (89%) of these cases resulted in conviction while only 8% were dismissed.
- Of those convicted in the upper courts:
  - Almost 48% were incarcerated (26% in state prison, 22% in local jails).
  - Thirty-six percent (36%) received sentences to probation.

There were 5,801 felony arrest events disposed in Other Areas of New York State in 1978. Of these:

- More than 99% of cases in the Other Areas were prosecuted, the highest proportion of all regions in the State.
- Over 70% of adult felony offenders disposed in 1978 were convicted, also the highest proportion among the three regions. (The rate of dismissal, at about 28%, was lower than in the other regions.)
- Of the convicted offenders:
    - Sentences to jail or probation were equally likely, each accounting for about one-quarter of those convicted.
    - Over 38% received a sentence of fine or conditional discharge.
    - Less than 6% were sentenced to prison.

Lower Courts

- Seventy-seven percent (77%) of those arrested in the Other Areas of the State were disposed in lower courts.
- Over 34% of these cases resulted in dismissal, and 65% resulted in conviction. Other dispositions were extremely rare.
- Of those convicted:
    - 26% were sentenced to incarceration (i.e., jail).
    - Almost 30% received fines.
    - Conditional discharge (21%) was more common than probation (17%).

Upper Courts

- In the Other Areas, 23% of those arrested were disposed in the upper courts (i.e., County Courts).
- Almost 90% of those arrested and disposed in upper courts were convicted; fewer than 7% were dismissed.
- Of those convicted in the upper courts:
    - Over 40% were incarcerated (20% in state prison and 21% in local jail).
    - Forty-two percent (42%) received sentences of probation.

NEW YORK STATE
VIOLENT FELONY WARRANT PROCESSING
1980

As part of a program to improve the enforcement of violent felony warrants[1] in New York State, the Statistical Analysis Center of the Division of Criminal Justice Services (DCJS) analyzes data on the processing of these warrants. The following analysis describes this processing for calendar year 1980.

Data for this analysis were obtained from the automated DCJS warrant data system. This system was extensively re-designed for 1980 resulting in several improvements in the data. Among the improvements was the requirement that the specific New York State Penal Law citation be included on all violent felony warrants entering the system. As a result, the offense designations of warrants issued in 1980 are more valid than those for warrants issued in previous years. Some differences in this area will, therefore, be noted in comparing these data with earlier reports.

The redesigned warrant system also provided agencies for the first time with the ability to designate whether a warrant was to be considered under the Warrant Enforcement Program because of the special status of the victim or because the offender was a recidivist[2]. Such cases are noted as "special cases" in the tables which follow.

In the data tables, jurisdictional areas are defined by the agency entering the warrant into the DCJS system, and in the case of cleared warrants, this may not necessarily be the same agency responsible for the clearance. "New York City" is an aggregation of the five boroughs comprising the City. "Other Metropolitan Planning Areas" (MPA's) is a grouping of six large counties which have generally similar population and crime patterns. "Other Areas" are the remaining counties of the State. "Multi-location Agencies" refers to criminal justice organizations which have jurisdiction in more than one county within the State. (The specific areas and agencies are shown in the tables.)

Basic Offender Characteristics

Table 1 presents general age, sex, and race breakdowns for violent felony warrant offenders in 1980. Statewide, the population of warrant offenders is young (74% are under 30, and the mean age is 26 years) and overwhelmingly male (92%). A slight majority are black (54%).

---

[1] A violent felony warrant is a warrant issued on an offender accused of committing or attempting to commit one of twenty-four serious offenses in the Penal Law specifically designated as violent felonies. During 1980 six new violent felony offenses were added to the original list of eighteen. See footnote (1), Table 2.

[2] The specific criteria for inclusion in this category are listed in footnote (1) of Table 2.

Offenders from multi-location agencies are not as young as those from other jurisdictions. Only 52% are under 30 and the mean age is 32 years. In New York City, 77% are under 30 years of age and the mean is 25. For areas outside of New York City, the comparable figures are 74% with a mean of 26 years. The overwhelming predominance of males over females is consistent across all jurisdictions. In New York City blacks constitute a majority of violent felony warrant offenders but they are the minority in other jurisdictions. Statewide distributions tend to mirror those of New York City because the City accounts for a dominant proportion of the State totals.

Warrant Activity

Table 2 summarizes violent felony warrant enforcement activity during 1980, the second year of program operation. It shows warrants issued in 1980, as well as warrants cleared and those remaining active at the end of the year. Cleared and active warrants are broken down into those issued in 1980 and those issued prior to 1980. These data are displayed by offense type and by the principal jurisdictional areas of the State.

Seven thousand six hundred forty seven (7,647) violent felony warrants were issued in New York State during 1980. Of these, 4,714 or almost 62% were cleared, leaving 2,933 active on December 31, 1980. Seventy-four percent (74%) of these issuances were from New York City. Of the clearances, 74% were also from New York City. The Metropolitan Planning Areas outside New York City accounted for an additional 11% of warrants issued and 12% of warrants cleared.

An additional 2,531 warrants issued prior to 1980 were cleared during the year leaving a total of 4,742 such warrants active on December 31, 1980.

A more detailed examination of 1980 warrant activity follows.

1. Issuances

The characteristics of violent felony warrants issued throughout the State in 1980 are presented in Tables 3 and 4.

a. Offense: With the changes instituted in 1980 (see above), violent felony offenses include four class A, eleven class B, five class C and four class D offenses within the Penal Law articles covering assault, homicide, sex offenses, kidnapping, burglary, arson, robbery and weapons offenses. As noted above, in 1980, "special" violent felony cases are also counted based on special characteristics of the victim or the offender's prior record. For this analysis, the individual offenses were collapsed into nine general categories and shown in the tables as offense "types".

"Offense" is the most serious charge for which the offender was wanted at the time of issuance of the warrant.

The data on 1980 issuances indicate that, of the nine major offense types constituting violent felony offenses, those for robbery and assault predominate. This is true in all principal areas of the state. In New York City, warrants for these offenses comprise 68% of all issuances; in the MPA's they are 63% and in "Other" areas, 53%. Warrants for burglary were a higher proportion of issuances in the non-New York City areas of the State (and particularly "Other" areas) than they were in the City. (Burglary warrants are generally less common in the 1980 data than in the 1979 data. This is considered to be a function of the change in the procedures for reporting offense designations in the redesigned warrant system. See above.)

Robbery warrants predominate in New York City (49% of all City issuances) in MPA's (33%) and in the multi-location agencies (47%).

Relatively few warrants (9%) were issued for kidnapping, arson, sexual offenses and special case offenses Statewide. Special case warrants were most common among issuances from the "Other" areas of the State and least common in New York City.

b. Monthly Trends: Statewide, more violent felony warrants were issued in September than in any other month in 1980. The number of issuances for that month was 860, representing more than 11% of the year's total. August was the peak month for multi-location agencies. For MPA's, the peak month was October.

The number of issuances was lowest in April with 486 or slightly more than 6% of the total for the year. Issuances were also low in February and December.

Computations based upon the data indicate that, Statewide, an average of 637 new program warrants were issued per month in 1980. New York City produced an average of 471 program warrants per month.

Over the entire year, the average change in the number of issuances from month to month is very slight, and in all except the MPA's it is negative. Statewide, the average percent change per month was a -0.9%.

2. Clearances

Data on the volume of clearances in 1980 violent felony warrants are contained in Tables 5 and 6. As with issuances, these are broken down by offense and month of clearances for each of the major areas of the State.

a. Offense: The offense distribution of clearances (Table 5) is very similar to that of issuances shown in Table 3. This suggests that in each of the principal areas of the State (including multi-location agencies), warrant enforcement activities were not directed toward any specific type of group of violent felony offenses. As with issuances, warrants for assaults and robberies constitute the bulk of offenses (69% Statewide) which were cleared. Burglaries constitute a greater percentage of clearances in the areas outside of New York City than in the City. (As with issuances, Burglary clearances are also less common in the 1980 than in the 1979 data.)

b. Monthly Trends: It can be seen from Table 6 that the peak month for clearances was October for New York City and the MPA's. November was the peak month of clearances for multi-location agencies, and August for the Other areas.

Calculations upon the data reveal that an average of 393 warrants were cleared Statewide each month. New York City contributed 289 to that number.

Month to month fluctuation in the number of program warrants cleared suggests a generally increasing percentage of warrants being cleared as the year progressed. The percentage cleared in January was particularly low for New York City (and consequently, the State), and for MPA's. (The date of clearance is the date that a cancellation notice, transmitted by the enforcing agency, is recorded on the DCJS warrant system. The low numbers of cancelled warrants noted for January, 1980 may be a function of system problems which prevented agencies from transmitting data to DCJS as well as the date the offender was apprehended and other factors.)[3]

In summary, the data show 7,647 violent felony warrants issued during 1980 and 4,714 of these issuances cleared during the year. About three quarters of this activity occurred in New York City. The most common warrant offense is robbery in New York City, MPA's, and multi-location agencies. In the "Other" areas, assault is the most common warrant offense.

Additional information on the processing of 1980 Violent Felony Warrants in New York State is presented in the Fourth Evaluation Report on the Violent Felony Warrant Enforcement Program, New York State Division of Criminal Justice Services, July, 1981.

---

[3] To minimize the influence of the extremely low number of clearances in January on the average percent change per month, this statistic is shown on Table 6 for the period excluding January as well as for the entire year.

(1) Starting with the 1980 report, the following have been added as special cases falling within the violent felony category: when the offense is committed (1) against a vulnerable victim (under 12 years old, over 60 years old or handicapped); (2) by a recidivist with two or more prior felony arrests and at least one prior conviction for a felony or misdemeanor; or (3) by an offender with a prior felony conviction. Also, the following six Penal Law offenses have been added to the violent felony category:

PL 120.11 Aggravated assault on a Peace Officer,
PL 130.70 Aggravated sexual abuse,
PL 265.02 Possession of a weapon, third degree,
PL 265.08 Criminal use of a weapon, second degree,
PL 265.09 Criminal use of a firearm, first degree, and
PL 265.12 Criminal sale of a firearm, first degree

The above offenses were counted as violent felonies and included in this report if the warrant was issued on or after September 1, 1980 for PL 130.70, and issued on or after August 12, 1980 for the other 5 offenses. Of the total 7,647 violent felony warrants issued in 1980, 587 represented new categories of which 127 were special cases and 460 were the six new Penal Law offenses.

(2) Includes cases with borough not specified.

(3) Percentages do not always add to 100.0 due to rounding.

LAW ENFORCEMENT OFFICERS KILLED OR ASSAULTED

In New York State in 1980, eleven law enforcement officers were killed in the line of duty. In addition, 4,749 officers were assaulted while performing their law enforcement functions. The number of officers killed rose from 1979 when seven officers were slain. Conversely, the number of officers assaulted decreased from 5,302 to 4,749 in 1980, a decrease of 10.4 percent. This section of the report analyzes the circumstances surrounding those assaults. In 1980, 83 percent of the assaults resulted in personal injury to the officers.

Weapons

As in the past years, physical force was the method most used in assaulting officers -- 82.1 percent. Handguns were next at 10.2 percent, followed by Other Dangerous Weapons at 4.4 percent, Knives at 3.0 percent and lastly, Other Firearms at 0.3 percent.

Activity

"Attempting Arrests" was once again the activity which led to the greatest number of assaults -- 40.6 percent. "Responding to Disturbance Calls" -- 18.1 percent, "Other Activities" -- 14.7 percent, "Handling Prisoners" -- 8.4 percent and "Handling Mentally Deranged Persons" -- 6.8 percent, were the next highest in frequency.

Assignment

Police officers assigned to two-man vehicles were again the most frequent victims of assault -- 48 percent -- as compared to 14 percent for those assigned to one-man vehicles, 10 percent for detectives or special assignments and 28 percent for all other assignments.

Time

Almost 47 percent of the assaults occurred between the hours of 4:00 PM and midnight -- the hours when police are usually their busiest. The hours of 8:00 AM to 4:00 PM showed the lowest rate of assaults -- 23 percent.

LAW ENFORCEMENT EMPLOYEES

Law enforcement agencies in 1980 reported a total of 64,710 persons -- uniformed and civilian, full and part-time -- were employed. This figure represents a slight decrease of one percent over the number of employees in 1979. The largest department was, of course, the New York City Police Department with 26,939 employees. The next largest departments, in order of size, were the State Police with 4,115, Nassau County Police with 3,981, Suffolk County Police with 2,897, and the NYC Transit Authority Police with 2,837.

A total of 85 percent of the employees statewide were uniformed officers of whom 96 percent were employed full time. Almost three percent of the uniformed personnel were females. Fourteen percent of the employees were civilian -- the same proportion as in 1979.

A total of 4,628 persons were employed by sheriff departments across New York State in 1980, an increase of nearly five percent over the previous year. Of all the sheriff personnel, 86 percent were uniformed and 14 percent were civilian. A total of 7,140 persons were employed by special police agencies, such as: authorities (transit, housing, port), parks, railroads, university campuses, etc. This figure is only slightly less than the number reported in 1979.

LAW ENFORCEMENT EXPENDITURES

During 1980, approxmately 90 percent of the state's law enforcement agencies submitted an estimate of their operating expenditures for the year. The combined figures totalled $1,563,808,191 of which $659,912,436 was expended by the New York City Police Department; $498,276,651 by other municipal police agencies; $225,312,719 by the specialized police agencies (authorities, railroads, parks, universities, etc.): $96,515,853 by the New York State Police; and $83,790,532 by county sheriff's departments.

In Memoriam

The Division of Criminal Justice Services joins the criminal justice community of New York State in extending its sincere sympathy to the families of the following law enforcement officers who gave their lives in the performance of protecting and serving the citizens of their communities during 1980:

* * *

ROBERT BILODEAU . . . . .New York City Police Department
Slain with a 38 caliber handgun while in the process of questioning five males on the street.

SERAPHIN CALABRESE. . . . . New York City Transit Authority Police Department
Slain with a 38 caliber handgun during an altercation with a recently released mental patient he had ejected from the subway.

JAMES DUNSTON . . . . .New York City Housing Authority Police Department
Slain with a 12 gauge shotgun when responding to a burglary-in-progress dispatch.

JOSEPH KEEGAN . . . . New York City Transit Authority Police Department
Slain with a 38 caliber handgun during a scuffle with a subject he was attempting to eject from the subway station.

HENRY RYMAN . . . . .New York City Police Department
Slain with a 32 caliber handgun while attempting to thwart the theft of his neighbor's car.

CECIL SLEDGE . . . . .New York City Police Department
Slain with a 32 caliber handgun as he approached a vehicle he had stopped that was suspected to have been used in neighborhood robberies.

IRVING SMITH . . . . New York City Transit Authority Police Department
Slain with a 38 caliber handgun during a robbery attempt of a local tavern.

ROBERT SORRENTINO . . . . .New York City Police Department
Slain with a 357 magnum handgun while searching for suspects in a robbery of a social club.

ROBERT VAN HALL . . . . New York State Police
Slain with a shotgun while approaching two narcotics suspects in parking lot of local car wash in Corning, New York.

GABRIEL VITALE . . . . .New York City Police Department
Slain with a 44 magnum handgun while investigating a burglary in progress.

ABRAHAM WALTON . . . . .New York City Police Department
Slain with a 38 caliber handgun while attempting to thwart an armed robbery of a local social club.

OFFICE OF COURT ADMINISTRATION

COURT OPERATIONS

The Office of Court Administration (OCA) publishes a report annually reflecting the operations of the courts in New York State. We have selected a number of tables presented in that report which complement the data gathered and reported by DCJS and with the consent of OCA present them hereunder.

THE COURT OF APPEALS

The Court of Appeals is the highest court of the State. Of the 648 appeals decided, 476 involved civil matters and 172 were criminal cases, as shown in Table OCA-I. The basis of jurisdiction in the Court of Appeals in 323 (68%) of the civil appeals disposed of was a reversal, modification, or dissent in the Appellate Divisions. Some 117 (25%) of the civil appeals were heard by permission of either the Appellate Divisions or the Court of Appeals.

In the 476 civil appeals disposed of, 305 (64%) judgments or orders were affirmed, 120 (25%) reversed, 35 (7%) modified, and 16 (3%) dismissed. Among the 172 criminal appeals disposed of, 108 (63%) judgments were affirmed, 55 (32%) reversed, and 4 (2%) modified.

APPELLATE DIVISIONS OF THE SUPREME COURT

The Appellate Divisions provide the first level of appeal from the superior trial courts in addition to performing other functions. Of the 9,341 dispositions, 6,269 (67%) were affirmances, 772 (8%) were modifications, 1,500 (16%) were reversals without a new trial, and 157 (2%) were orders of new trials, as shown in Table OCA-II.

APPELLATE TERMS OF THE SUPREME COURT

The Appellate Terms of the Supreme Court received 2,187 appeals and disposed of 1,574 in 1980, as shown in Table OCA-III. The First and Second Departments together rendered 1,088 decisions, filed 1,018 per curiam opinions and wrote 49 memoranda (not filed). 3,997 motions were heard or submitted.

CRIMINAL PROCEEDINGS

A total of 10,051 felony defendant-indictments were awaiting disposition of their cases in Supreme Court in New York City at the end of 1980. This compares with 8,918 pending at the end of 1979. A breakdown of these indictments by county is presented in Table OCA-IV.

The Supreme Court and County Courts Outside the City of New York

As reported by local detention facilities, 1,229 detainees were awaiting action in Supreme Court and County Courts outside the City of New York at the end of December 31, 1980. Of these, 14 had been detained over one year. This compares with 966 detainees awaiting action in the same courts at the end of 1979 - 14 for over one year. Table OCA-V shows the number of defendants detained by judicial district.

The Criminal Court of the City of New York

The Criminal Court of the City of New York has jurisdiction over misdemeanors and lesser criminal offenses. It is also the arraignment court of felonies

Table OCA-VI summarizes the court's activities in arrest cases for 1980. The total number of filings during 1980 was 182,968 compared with 203,367 filings in 1979.

There were 178,333 cases disposed of in 1980, compared with 200,456 dispositions in 1979. Table OCA-VII presents a listing of dispositions by number and percent by county for these two years.

According to the New York City Department of Correction, 1,375 defendants were detained while awaiting action in Criminal Court of the City of New York at the end of 1980. Table OCA-VIII lists the number of detainees at the end of 1979 and 1980 by stage of processing.

PROBATION

The New York State Division of Probation publishes data annually describing the workload of probation agencies in New York State. We have selected a number of tables and charts presented in that report, entitled the "Statistical Supplement to the Annual Report" which highlight probation activities and complement the data gathered and reported by DCJS.

With the consent of the Division of Probation, we present, hereunder, these "Highlights of Probation", together with selected tabular and graphic material reflecting various aspects of probation activity.

HIGHLIGHTS OF 1980
BASED ON
ANNUAL REPORTS OF WORKLOAD IN PROBATION DEPARTMENTS

Family Intake

Cases opened for intake services increased from 128,833 in 1979 to 136,539 in 1980. Of this latter figure, 42,364 were received by the New York City Probation Department.

Investigations

Regular investigations (J.D., PINS, Pre-Plea, Pre-Sentence) completed increased 7% (from 121,318 in 1979 to 129,366 in 1980).

Pre-Disposition

Supervision of Pre-Disposition supervision cases decreased by 10% in 1980 to 12,424.

Probation Supervision

The number of probationers received during 1980 increased by 1% over the previous year to 43,500.

The number received for probation supervision upstate decreased by 1% to 27,641. The number of probation supervision cases remaining under supervision at the end of the year increased by 8% to 71,332. Of this number, 29,942 were being supervised by the New York City Probation Department.

The number of probation violations filed in criminal courts increased by 5% over the previous year to 8,865.

Probation departments statewide collected $5,845,793.43 in fines, restitution, support and fees.

CORRECTIONAL SERVICES

The New York State Department of Correctional Services has made available for inclusion in the 1980 Annual Crime and Justice Report data concerning admissions to department custody, inmates under custody, and releases from department custody. These data complement other data contained in this report and should provide a better understanding of the criminal justice process.

Under Custody Population (Exhibit 1 and 2)

The number of inmates under custody declined from 12,579 at the beginning of calendar year 1971 to a low of 12,444 at the close of 1972. This decline began in 1964 and continued over a nine-year period. Contributing to this decline was the Baxtrom decision which led to the release from Department custody of all criminally insane inmates held beyond their maximum expiration dates along with related decisions which ended the practice of holding under custody dangerously mentally incapacitated persons for long periods of time. These decisions, coupled with other factors including a revised Penal Law which became effective in September of 1967, changes in sentencing procedures, and the development of major institutional program for drug addicts by the state's drug control agency, resulted in an annual net loss in the under custody population which continued through 1971. This situation was reversed in 1973 when admissions exceeded releases for the first time since 1963. This rise in the under custody population has continued through 1980 when the under custody population rose to 21,644, an increase of 73.9 percent over an eight-year period.

Admissions to Department Custody (Exhibit 3)

Admissions registered a steady rise from an annual total of 7,358 in 1971 to a peak of 10,272 in 1977. The number of admissions fell to 8,836 in 1978 but then rose to 9,458 in 1979 and to 10,201 in 1980. The high number of 1976 and 1977 admissions reflected efforts by the Office of Court Administration to reduce a large backlog of serious felony cases pending before the Supreme Court which resulted in the temporary acceleration of the already high and rising rate of court commitments. Court commitments account for eight of ten admissions and trends in this category largely shape the flow of offenders into State prisons. Court commitments declined to 4,250 in 1970. From this 1970 low, commitments have risen to a high of 8,436 in 1977, an increase of 98.5 percent. Beginning in 1971, felony commitments rose rapidly, offsetting declines in other types of commitments. Contributing to this trend has been a rise in felony arrests and court dispositions and an increasing tendency of the courts to commit convicted felons to state correctional facilities. Several more stringent laws enacted in 1973 have added to this increase in commitments. These include the Second Felony Offender Law, which has imposed mandatory indeterminate sentences on such offenders; a drug law which has imposed harsher penalties on drug offenders; and the law imposing mandatory indeterminate terms for all Class B felonies and for certain Class C and D felonies. The trend toward increased court commitments is expected to continue into 1981 reflecting the impact of the violent felony offender legislation which became effective in September 1978.

Releases from Department Custody (Exhibit 3)

Releases from DOCS custody remained relatively stable during the five-year period, 1971-1975, averaging 7,285 annually. In 1976 a sharp rise in releases is observed, up 10% over the previous year. This substantial rise reflected a growth in the pool of parole eligible inmates in the burgeoning inmate population who were subsequently released to parole supervision. 1978 saw a temporary drop in releases which reflected longer minimum periods of incarceration being set by the Board of Parole and a modest shift toward longer sentences on the part of the courts, both of which lessened the number of paroles. Releases for 1979 and 1980 resumed an upward trend, including all time high volumes of parole and conditional releases.

Reason for Commitment (Exhibit 4)

Of the 1980 commitments, 96 percent were sentenced as felony offenders. The remaining four percent were sentenced as Youthful Offenders. About one out of three commitments (32%) were sentenced as a second or persistent felony offender.

The largest portion (54%) of the 1980 commitments had been convicted of Violent Felony Offenses. About one out of four of these VFO commitments had been sentenced as second felony offenders. Commitments for robbery led the VFO group followed by crimes of homicide, burglary, assault, sex crimes and dangerous weapons offenses.

Among commitments for other felonies, two out of five were sentenced as second felony offenders. Burglary was the largest crime in the other felony group followed by dangerous drugs. These two categories accounted for nearly 60% of the other felony offenses. The next largest groups were dangerous weapons, robbery and grand larceny, each accounting for about 8% of the other felony total.

COMMISSION OF CORRECTION

The major responsibilities of the Commission of Correction are: to insure humane treatment of prisoners and detainees; to facilitate the operations and programs in correctional facilities; and, to review the operations and programs within the criminal justice system, as other segments of that system affect corrections.

In responding to these responsibilities, the Commission monitors and evaluates all correctional facilities in the State of New York; including county jails, penitentiaries, village and town lock-ups, facilities operated by the NYS Department of Correctional Services and the New York City Department of Corrections. The Commission also provides training and supportive services to local correctional personnel.

For this report, the Commission has made available data on admissions to county penitentiaries and county jails for 1978, 1979 and 1980.

Total admissions to the four county penitentiaries increased from 3,776 in 1978 to 4,406 in 1980, a gain of 16.7%. During this period, male admissions were up 19.3%, while female admissions dropped 7.8%. Black males made up the largest single category of admissions in 1980, a position held by white male admissions in 1978 and 1979.

Admissions to county jails increased from 93,820 in 1978 to 103,367 in 1980; an increase of 10.6%. In 1980, males accounted for 90.1% of the admissions compared to 9.9% for females. For the three year period 1978-1980, white males accounted for 61.7% of the total admissions to county jails and black males an additional 24.9%.

DIVISION FOR YOUTH

The New York State Division for Youth has made available for inclusion in the 1980 Crime and Justice Report data on admissions, releases and placement levels.

Juvenile Delinquents accounted for 61.8% of the total admissions, with Persons in Need of Supervision contributing an additional 19.2%. Among the 1,934 admissions, there were 85 (4.4%) Juvenile Offenders who have committed more serious offenses as defined by the Juvenile Justice Reform Act (see Table I).

Secure programs accounted for 5.8% of the total admissions, non-community-based programs 32.0%, community-based programs 43.5% and cooperative voluntary and alternative placement the remaining 18.7%.

Overall, 90.7% of the admissions were first admissions to the Division. For secure programs 99.1% were first admissions, 91.9% for community based programs, 85.5% for community based programs and 98.1% for cooperative voluntary and alternative placement (see Table II).

In all programs levels, boys made up 82.3% of the total under custody. They ranged from 96.4% for non-residential services to 64.9% foster care programs (see Table III).

DIVISION OF PAROLE

Parole Board Activity

During the year, the Parole Board conducted almost 17,000 hearings in state and local prison facilities to determine parole eligibility for certain inmates, release of inmates to parole and re-release of parole violators and other administrative hearings. Table 1 displays the different types of hearings conducted by the Board of Parole.

Of particular note in Table 1 are the MPI[*] and prison release hearings. The number of MPI Hearings (3,086) held during the year represented a 37% decline from that of the previous year. This trend reflects the increasing number of offenders entering prison with a court-set minimum.

Inmates who have served their judicially imposed minimum sentence or Board-set minimum become eligible for an initial parole release hearing. During 1979-80, these inmates numbered 6,448. Parole release was granted by the Board to more than half (52%) of those initial parole eligibles. The initial release rate increased marginally (.9%) over that of the previous year.

Reappearance hearings are held for those inmates who have been denied parole and reappear before the Board for a release decision. During the 1979-80 period, 2,168 inmates saw the Board for a reappearance hearing. The Board granted release to 1,389 of those inmates (a 57% reappearance release rate).

During 1979-80, the overall paroling rate from state correctional facilities was 54%, a slight increase over that of the previous fiscal year. (NOTE: This percentage also includes a small number of re-released parole violators.)

Institution Parole Services

The workload of parole officer staff within correctional facilities is determined by the number of incoming inmates, preparing them for parole release and assisting the Parole Board in conducting hearings. During the year, the parole officers in state and local facilities conducted 34,931 inmate interviews related to Parole Board hearings and held 833 classes to acquaint parole eligible inmates with Board hearing procedures. Table 2 displays some of the major activities of the institutional parole staff.

During the latter part of 1979-80, the Division decided to shift the focus of institutional parole activities. A greater emphasis was placed on counseling inmates with problems that could affect their success while on parole in the community. The institutional parole officers now assume more of an advocacy role by identifying and obtaining needed counseling services for the inmates. Also, the staff attempts to involve inmates more in the Pre-Release Center programs. Pre-Release programs are mainly run by inmates who provide peer counseling in a variety of areas; e.g., preparing for employment or changes that an inmate may be confronted with upon return to his/her community or family. There are Pre-Release Centers within 14 of the 33 state correctional facilities.

The decision to shift the focus of institutional parole staff was based on an agency goal to improve inmate transition to the community. Another basis for this decision was the result of a staff-time allocation study conducted by Audit and Control. The study showed that the new programmatic thrust could be implemented without affecting Parole Board related activities, particularly, in view of the declining number of MPI hearings and related case preparations. The progress of this new institutional program initiative will be reported on in subsequent annual reports.

---

[*] **Minimum Period of Imprisonment**

Finally, the institutional parole officer continued to participate on the correctional temporary release committees in deciding which inmates are granted temporary work release, furlough and other leaves of absence for good cause.

Community Supervision of Parolees

During all or part of the year, there were 23,325 individuals under community parole supervision. Approximately 91% of these parolees were being supervised within New York State. The remainder were being supervised out of state, pursuant to the Inter-State Parole Compact with sister states. (See Tables 3 and 4.)

The average monthly parolee population within-state was 16,739. The net population increase from April 1979 to March 1980 was plus 5.8%. The year closed with a total of 17,244 parolees under community supervision within the state. (See Table 3.)

Parolee Profile /1

Two-thirds of the individuals under community parole supervision during the year were residents of New York City. The other 33% were from upstate areas.

Ninety-six percent (96%) of the parolees were males. Slightly over half (52%) were Black, 30% White, 17% Hispanic and 1% other ethnic groups. The median age of all parolees was 30.8 years.

The parolees were originally convicted and sentenced to prison for a variety of crimes. The five most frequently committed offenses were: robbery (33%), drug selling (13%), murder/manslaughter (12%), burglary (10%) and assault (5%). The remaining 27% were convicted for offenses which include arson, drug possession, rape and weapon possession.

Forty-seven percent (47%) of the parolees received a maximum sentence of 5 years or less; 21% received 6-9 years; 14% received 10-15 years; and 18% received a maximum sentence of 15 or more years.

The mean time served in state prison for parolees prior to parole was 33 months; but there was a significant amount of variation around this average, depending on individual offense convictions. Further, the 33 month average excludes time offenders spent in a local jail prior to being transferred to a state facility.

Outcome of Parole Supervision

Less than 10% of all parolees under supervision during the year were returned to prison by the courts for committing new crimes or by the Parole Board for violating the rules of parole (e.g., absconding, or illegal use of drugs).

/1 Profile data were obtained using a sample of 18,144 parolees.

The overall prison-return rate for the current year represented a slight increase of 0.6% over that of the previous year. This increase, however, resulted primarily from parolees returned for violating conditions of parole rather than commission of new crimes.

The rate of prison returns for violation of conditions of parole rose by 0.9% between 1978-79 and 1979-80. The rate of prison returns of parolees who were convicted of new crimes, by contrast, declined by 0.2% between these same years. (See Table 5.)

In view of Table 5 data on parolees returned to prison in 1979-80, the parole supervision success rate can be measured in several different ways.

- First, in terms of the total number of parolees not returned to prison, the success rate of parole supervision during the year was 90.6%. This result is an indication of the Division's overall performance in deterring parolee crime and reincarceration.

- Second, from the point of view of enforcing the rules of parole, parolees returned to prison for rule violations cannot really be considered "failures" in the same sense as those who were returned for new criminal convictions. Absconding from supervision or use of illegal drugs, for example, is less serious than committing a violent offense. Furthermore, a prison return based on a rule violation decreases the chances of a parolee being a threat to community safety. Given this, the supervision success rate was 97.1% (i.e., only counting as real criminal recidivists the 678 parolees reincarcerated for new crimes during the year).

- Finally, using a much "softer" measure of the number of deterred parolee delinquents, the supervision success rate for the year was estimated at 75.0%. This estimate is based on the number of parolees who were neither returned to prison during the year for any reason nor in any form of delinquent status at the end of the year. Those in delinquent status are either unapprehended absconders from supervision, or involved in the parole hearing process (to decide on whether a parolee's behavior warrants revocation of parole).

Revocation decisions are made by the Parole Board on a case by case basis, taking into account the seriousness of the alleged delinquent parole behavior, evidence for the behavior and whether reincarceration of a parolee would benefit society. The reader is, therefore, cautioned that not all parolees in delinquent status at the end of the year will subsequently have their parole revoked. To this extent, this third measure of supervision success or nondelinquents by the end of the year is tentative or "soft" at best.

Based on an average of the three preceding specific rates, the comprehensive success rate for parole supervision for the year was 87.6%. This was comparable to the 88.0% overall success rate for the 1978-79 period.

NOTE: The Division of Parole has made the above data available from their Annual Report (1979-80).

Table 1

Type of Hearings Conducted by Parole Board Between April 1, 1979 and March 31, 1980

Type of Hearing	Number	Percent
Minimum Period of Imprisonment (MPI)	3,086	18.3%
Release of State Prison Inmates (Initial and Reappearance Hearings)	9,393	55.8%
Release of Local Prison Inmates	2,700	16.0%
Parole/Conditional Release Revocations*	415	2.5%
Re-Release of Parolees Returned to Prison for Violations	869	5.2%
Administrative Hearings**	357	2.1%
TOTAL	16,820	100.0%

* A conditional releasee is an inmate released from prison by statute, not by the Parole Board. Such an individual is released to parole after having served two-thirds of his/her maximum sentence in prison. Revocation hearings for inmates released by the Board are conducted by specialized Hearing Officers, who were involved in 7,352 preliminary and final revocation hearings during 1979-80.

** Administrative hearings include cases of inmate appeal of Board decisions and cases where a favorable release decision was rescinded because of inmate infractions prior to date of actual release.

Table 2

Institutional Parole Activity Between April 1, 1979 and March 31, 1980

Activity	Number
Parole Orientation Classes for Inmates	833*
Inmate Interviews for Parole Board Hearings	34,391
Pre-Release Inmate Interviews	11,071
Inmate Group Counseling Sessions	132**

* Involved an average of 27 inmates per class.
** Involved an average of 8 inmates in three facilities.

Table 3

In-State Distribution by Area Office As of March 31, 1980

Parole Area Office	Number of People Under Parole Supervision	Percent *
Manhattan-North	1,379	8%

* Percents may not equal 100% due to rounding.

Table 4

Parolee Movement and Census for Years 1979-1980 and 1978-1979

Movement/Census	1979-1980	1978-1979	Percent Change 1978-1979 To 1979-1980
April 1 Active Parolees	14,003	13,463	+ 1%
State Inmates Released by Board	5,638	4,817	+ 17%
by CR	2,400	2,126	+ 13%
Local Inmates Released by Board	891	598	+ 49%
Cooperative Parolee Agreement from Other States	393	368	+ 7%
Total Inmates Released to Parole Supervision	9,322	7,909	+ 18%
Total Caseload Removals /1 (Discharges and Returns)	8,389	7,374	+ 14%
Dynamic Population for Year /2	23,325	21,377	+ 9%
March 31 Active Parolees	14,936	14,003	+ 7%
Delinquent Parolees /3	3,666	3,681	- 1%
Total End of Year Caseload (3/31)	18,602	17,684	+ 5%

/1 Removals include parolees discharged from parole supervision by expiration of maximum sentence, death, Board action, court order and prison returns.

/2 Dynamic population is the cumulative number of parolees under supervision during all or any part of the year.

/3 Delinquents are those parolees carried by parole officers who are either in the stages of the violation process or are absconders. Not all delinquents in the violation process will have their parole revoked.

Table 5

Parolee Prison Return Rates

Outcome Measure	1979-1980 /1	1978-1979 /2
Rate of Parolees Returned To Prison With New Court Conviction During Year	2.9% (n=678)	3.1% (n=675)
Rate of Parolees Returned To Prison For Violating Conditions of Parole During Year	6.5% (n=1,510)	5.6% (n=1,201)
Total Rate of Prison-Returns During Year	9.4% (n=2,188)	8.8% (n=1,876)

/1 Rates computed on basis of dynamic population of 23,325 parolees during April 1, 1979 to March 31, 1980.

/2 Rates computed on basis of dynamic population of 21,377 parolees during April 1, 1978 to March 31, 1979.

CRIME VICTIMIZATION

The Crime Victims Compensation Board has made available data from their 1980-81 Annual Report for inclusion in the 1980 Crime and Justice Annual Report.

Claims Analysis

The Crime Victims Compensation Board compensates innocent physically injured victims of violent crime for unlimited unreimbursed medical expenses and loss of earnings and/or loss of support up to $20,000.00 including funeral expenses up to $1500.00. Violent crimes or crimes against the person (murder, rape, robbery and assault) accounted for less than 15% of the total offenses reported statewide. Under 3% of all crimes or about 15% of violent crimes involve medical treatment and other financial losses to the victim potentially covered by the State crime victim compensation program. While seemingly small in percentage terms, the crime victims eligible for compensation under the state program represent the thousands of victims most critically in need of financial assistance for crime-related injuries and losses. (Most financial loss of crime victims involve property losses not covered under the present program.)

The number of claims received during the 1980-81 fiscal year rose sharply from the previous fiscal year, an increase of 18% over last year. This continues the progression of previous years.

This increase was due in part to the fact that all law enforcement agencies in New York State, where a crime may be reported, have on hand claim forms and information brochures relating to the availability of compensation from this Board to every victim of a violent crime. Inasmuch as there has been and continues to be an increase in public awareness of the Board, we anticipate similar substantial increases in the next fiscal year.

Under innovative legislation signed by Governor Carey (Chapter 415, Law of 1979, effective October 1, 1979), the Board's statutory mandate was extended to "actively speak for the rights and interests of crime victims" in the criminal justice system. This legislation added ten new powers and duties to the Board's existing statute. The Board was charged with coordinating and planning programs serving victims of crime on a statewide basis, advocating the rights and interests of crime victims before other units of government, conducting research on the problems affecting crime victims, and advising the Governor and the Legislature on laws and procedures affecting crime victims in New York State.

Effective April 1, 1979, the Board commenced operations of a unit for the elderly. This unit which is comprised of two investigators and a typist was responsible for handling all claims filed by victims or their dependents who are 60 years or older and to follow up on these cases including contact with victims or relatives, hospitals, doctors, employers, etc. The unit rendered special assistance to the elderly, as was required, by assisting them in the preparation of required documentation for processing the claim. The unit has significantly reduced the amount of claims that were disallowed for lack of documentation and has demonstrated that the elderly require this special assistance.

WORKLOAD SUMMARIES
